Dear Students

Welcome to Options Computing! This newsletter aims to give you an overview of some of the opportunities and information on companies attending the Computing Careers Fair.

Where other sectors have suffered job losses over the past five years, technology has continued to power ahead both in terms of jobs created and export performance. According to ICT Ireland, the sector’s representative body, 9 of the top 10 global software, 9 of the top 10 US technology companies and all of the top 10 ‘born on the internet’ companies are now based in Ireland. Even in the last month another 450 jobs have been announced in areas such as cybersecurity, cloud connectivity and e-commerce.

The Computing Careers Fair on the 24th November is a major event this term, where national and international technology firms, recruiting across different specialisms will be in attendance in the O'Reilly Institute. This is a perfect opportunity to meet with prospective employers, find out about the opportunities on offer and hone your networking skills. Do your research on the companies beforehand, meet their representatives and tailor your application accordingly. Look out, too, for other opportunities to meet with potential employers throughout the year at presentations or other networking events. And, of course, if you are interested in starting your own technology business there are various opportunities to join meetups in Dublin and help is also available at the Blackstone Launchpad website—www.launchpadtrinity.org/

Keep checking for details on these and other activities at www.tcd.ie/careers/events.

Finally remember we are here to help with applications and interviews!

Sean Gannon
Careers Consultant for the School of Computer Science & Statistics
Exciting Graduate Opportunities – Software Development – Summer 2017

Do you have a keen interest in technology and how it can be used to solve real business problems?
At BearingPoint Ireland, we have a number of exciting projects to challenge the very best graduates. We are working with a wide range of clients building technology solutions that are transforming the way business is being done in Ireland. We are currently looking for some talented graduates to join our successful Technology Consulting team.

Candidates should have a degree in Computer Science or Computer Engineering.

To learn more about consulting with BearingPoint Ireland and to meet some members of the team, please visit www.BearingPointCareers.ie

We look forward to receiving your application!
WHAT I BUILD IMPACTS WORLD MARKETS, NOT JUST LOCAL BUSINESS.

Engineering at Bloomberg works on some of the most fascinating – and influential – technical challenges in business and finance. We’re looking for top developers with a passion to design, build and deploy solutions that have a real impact on financial markets worldwide. Are you ready to make your mark?

YOU + ERICSSON a powerful combination
Equifax powers the financial future of individuals and organizations around the world. Using the combined strength of unique trusted data, technology and innovative analytics, Equifax has grown from a consumer credit company into a leading provider of insights and knowledge that helps its customers make informed decisions. The company organizes, assimilates and analyzes data on more than 820 million consumers and more than 91 million businesses worldwide, and its databases includes employee data contributed from more than 5000 employers. Headquartered in Atlanta, USA, Equifax operates or has investments in 24 countries and employs approximately 9,400 employees worldwide.

Equifax opened a Research and Development Centre on Sir John Rogerson’s Quay in Dublin in January 2016, with a focus on developing new products and components, while leveraging the latest technologies in an agile environment to create best of breed solutions for our customers. We have grown to 80 staff already this year, and expect to continue that growth into next year and beyond. We currently have a broad range of open roles for people with various levels of experience, and we have a particular interest in bringing in strong, enthusiastic graduates.

Join our Graduate Programme

As we are a growing company, Munich Re Automation Solutions Ltd are looking to take on Graduates to rotate through various departments and learn how our business works in all areas. We are looking to hire talented people with a background in Computer Science/IT/Business or similar degrees to gain experience in the areas of Technology, Finance, Marketing, Business Analysis/Pre-Sales, Customer Services, IT Services, Data Analytics, Product and Project Management. The Graduate programme will take place over an 18 – 24 month term at which time the Graduate will be placed permanently in a suitable position.

To apply, please send CV and cover letter to:
Sandra Kelly, HR Manager – E: automationsolutionscareers@munichre.com
Every day, banks, asset managers, corporations and utilities worldwide rely on Murex to develop, implement and support their trading and risk activities. As a leading software house, it’s our job to pioneer technologies that drive the capital markets – a challenge that our 2,000 employees relish.

Do you share our appetite for challenge?
Each day brings something new: the projects are varied and the view truly global. It’s a sleeves up, hands on, high-tech approach, sharing and evolving in a multicultural environment.

From day one your contribution will count and your work will matter to your colleagues and your clients. As part of a global and diversified team, you will build on your skills and experience, learning in a friendly and supportive culture and from our continuous development programs.

Find your future challenge with Murex:
