Dear Students,

Welcome to the first issue of Options Engineering! This newsletter aims to give you an overview of some of the opportunities and information on companies attending the Engineering Careers Fair. One important piece of advice is that many companies in the Engineering sector have early closing dates so try not to miss any upcoming deadlines. Do your research, meet the company representatives and tailor your application accordingly.

A major event this term will be the Engineering Careers Fair on the 20th of October, where 30 national and international engineering firms recruiting across different specialisms will be in attendance in the Exam Hall. This is a perfect opportunity to meet with prospective employers, ask interesting questions and hone your networking skills. Look out too for other opportunities to meet with potential employers throughout the year.

Keep checking for details on these and other events are at www.tcd.ie/careers/events. Finally, remember we are here to help with applications and interviews.

Marielle Kelly
Careers Consultant for Engineering
TRINITY COLLEGE
ENGINEERING CAREERS FAIR
20th October 2016
12noon - 2:00pm
The Exam Hall, TCD
ENGINEERS IRELAND – SUPPORTING STUDENTS FOR THE CHALLENGES OF TOMORROW

Engineering is transforming how people work, live and experience the world. In energy, transport, health, water, the digital economy and more, engineers are at the heart of the endeavour to improve lives and living standards.

The evolving role of the engineer in modern society challenges engineers to stay constantly ahead of the curve - to be change-makers ready to harness innovation in a constructive and valuable way for society. And as an organisation, Engineers Ireland is at the forefront of the debate on future skills needs, to reflect the changing nature of contemporary engineering.

We play a vital role in improving the standards of engineering practice in Ireland – assisting in the development of engineers’ skills base so that they are ready to solve global problems in areas like water supply, energy supply and food supply – challenges that will feature high on the global agenda for the foreseeable future.

We are responsible for accreditation of programmes of engineering education, setting standards for practicing engineers, for supporting engineers in achieving and exceeding those standards and for inspiring future generations of engineers. We do this through a vibrant community of engineers and stakeholders who include our 23,000 members, industry partners, academia and policy makers.

Our future, quarried in the promise of innovation and new ideas, will be shaped by engineers like you across the wide breadth of our profession and we would encourage all student engineers to start their membership journey with Engineers Ireland today. Undergraduates currently studying an accredited engineering programme can avail of a free Engineers Ireland membership until graduation, and a free transfer to full membership thereafter.

Through our student membership scheme, we assist graduates in their early career stages with a number of courses, initiatives and services. We also host the annual Innovative Student Engineer of the Year Award, which is designed to foster third level student’s ingenuity and talent.

To begin your student journey with Engineers Ireland and for a full list of benefits, please visit: http://www.engineersireland.ie/Groups/Students.aspx

For additional information or queries regarding membership, please contact our Membership Team by email via membership@engineersireland.ie
Graduate Opportunities at Arup

When you join Arup, you immediately become part of Arup’s global community working on some of the world’s most recognised projects.

Ethos Engineering provides mechanical and electrical design consultancy services to public and private clients in the fit out, commercial, healthcare, industrial, electronic, retail, pharmaceutical data centre sectors. We won Consultancy of the Year 2015 and retained it in 2016. We won Employer of the Year 2015—2016 (Medium size category UK and Ireland). We also won Fit Out Project of the Year 2014.

We are a highly motivated and driven company, composed of experienced, commercially aware engineers with excellent industry experience. Our engineers produce designs that are detailed, innovative, and practical, while at the same time are economical, socially responsible and sustainable.

In 2005 we started with 9 employees, we now exceed 80. According to our featured employees on LinkedIn we are a great company to work with, we provide excellent facilities for employees and we have a friendly and helpful team. We reward employees hard work with all-inclusive trips abroad at Christmas, a brand new office fit out, frequent social events, social societies e.g. golf and football, gym membership, fun team building events, 3.00pm finish on Friday’s and much more...

We promote a “Can Do” attitude We visualise success and growth, Our mission is to be the company people want to work for and with, Our values are our employees and clients and Our priorities are to exceed our clients expectations every time and to enhance employee well-being through implementing engagement tools.

At Ethos Engineering the Social Committee organise events and activities that foster positive relationships between employees and management. Social Committee members are picked from a pool of available employees. Having employees as members enables the Committee to better understand the diverse nature of the company. The purpose of the Social Committee is to boost employee morale and to bring an element of fun into our busy fast paced environment. We are aware that our success is a reflection of the hardworking motivated team that stand beside us and we take pride in rewarding them as much as possible.
Kingspan Group is a market leader and innovator of a range of sustainable and energy efficient products for the construction industry. The group is comprised of 5 divisions: Environmental, Access Floors, Insulated Panels, Insulation and Light & Air.

At present, Kingspan is present in over 85 countries across the globe. This comprises an impressive 90+ global operations (and growing) and 10,000 employees.

We seek a unique combination of personality, creativity and skill. The graduates of today will help us provide sustainable solutions to the problems of the future. Above all, you should be looking for a challenge, have real business potential, be prepared to accept responsibility and work on your own initiative.
