Interpretive inquiry quite rightly continues to expand and become increasingly recognised as a valuable part of the development of programmes of research and associated promotion of coherent frameworks of investigation in which individual studies can be located and linked. While individual researchers continue to develop individual projects, programmes of research can be created around the shared interests and combined research expertise of a group of researchers working within and across disciplines, schools and universities to address a particular research question or agenda.

The Grounded Theory Collaboration Group, in association with the School of Nursing and Midwifery (Trinity College Dublin) and the School of Education (Trinity College Dublin) is delighted to invite you to attend a two-day workshop. The purpose of this workshop is to help you to explore the potential use of Grounded Theory methodology and the analytical techniques inherent within this approach.

The organisers invite all postgraduate research students who are utilising the methodology holistically or a particular aspect of it in their research, and irrespective of the research aim and/or discipline within which the project is located.

We are happy to offer this workshop to each delegate for a nominal fee of €25.00 for one day or €45.00 for both days (to include coffee and light lunch).

Making the workshop relevant to your project

Research students are invited to submit queries that have emerged in terms of the methodological issues that are relevant to your work. Please submit your queries by Tuesday 29th October to Dr Joan Lalor at lalorj1@tcd.ie

To book your place, please contact:
Jeni Ryan, Administrative Officer - Events, School of Nursing and Midwifery ryanjen@tcd.ie

There are only 30 places available which will be allocated on a first come, first served basis. Payment in advance is necessary to secure a place.
