Research topic: Coping with Cyberbullying

Abstract: Cyberbullying has been defined as any behaviour which is performed through electronic or digital media by individuals or groups that repeatedly communicates hostile or aggressive messages intended to inflict harm or discomfort on others. Cyber victimization has been linked to difficulty concentrating at school, depressive symptoms, and suicidal ideation. The research will investigate and assess the effectiveness of coping methods used to combat cyberbullying. It is vital that this problem is addressed if all students are to achieve their full potential in the education system.
