

Biology and Control of the invasive  
bivalves *Dreissena polymorpha* and  
*Corbicula fluminensis*

Prof. R.F. McMahon,  
Biology Dept., UTA,  
Arlington Texas

Workshop 16.00 Zoology Dept., TCD.

Thur 21st Oct.

Prof McMahon has been working with these species and the impacts of their introduction to the USA for over 25 years and is a key advisor to the US Government on their control. In this workshop he will outline the pattern of introduction, the biology of the species and the current thinking in terms of their impact reduction and control.

See <http://www.uta.edu/ra/real/editprofile.php?pid=89#11>

There will be a question-and-answer session at the end so specific problems can be discussed.
