FN/13 - 14/101 Global Relations Quarterly Report

(Minute FN/13-14/69 of 19.02.2014 refers)

The Vice-President for Global Relations and the Director of Internationalisation attended for this item.

The Committee considered the circulated quarterly report to June 2014 from the Vice President for Global Relations dated 04.06.2014, noting the key issues impacting on expenditure in the period reported, including delays in recruitment and budget phasing. The Committee, noting the updated Non-EU student recruitment position at June 2014 (including the overall target for student entry in September 2014), expressed concern at the current level of undergraduate acceptances versus the targets set, however acknowledged that they will be compensated for by the uplift in visiting student numbers. In the context of revisions to the Global Relations Strategy, as part of the new Strategic Plan, the Committee noted that the non-EU student cohort target would increase from the original target of 14% of total student numbers to 18%.
Having considered the impact of the Global Officers on student recruitment, the Committee requested that a comparative analysis between Schools with and without Global Officers be undertaken as a means of assessing their impact and that the results should be included in the next quarterly report. In addition, the Committee requested that a performance metric on the acquisition cost of students be included in the next report also.

Noting the overall financial position along with the detailed schedules around student numbers, the Committee thanked the Vice-President for Global Relations and Director of Internationalisation for their report and invited them to provide a further update in September 2014.

The Director of Communications and Marketing attended for this item.

The Committee welcomed the second report on the Communications Strategy from the Director of Communications and Marketing, dated 03.06.2014, and noted the update provided under the headings of key achievements and budget, as circulated. The Committee expressed concern about the tangibility of the achievements of the Strategy to date and their measurability. Noting that the report lacked performance metrics in this regard, the Committee requested that such metrics would be included in future reports. The Committee also requested that the Director of Communications and Marketing liaise with the FSD and adopt the new, standard reporting template for future reports on the Strategy.

Lastly, the Committee, in welcoming the re-introduction of the posting of Board decisions on the College intranet, requested that this be extended to Council decisions also and that a College-wide communication be issued to notify the community at large in this regard.

The Committee considered the circulated report from the Executive and Technical Director of TBSI dated June 2014, noting the high level update on its activities since the last report along with a financial summary of the Institute and details of the research proposals submitted and contracts awarded in the reporting period. Having considered the full schedule of grant applications made in the reporting period as attached, the Committee queried its completeness and requested that it would be reviewed and updated if necessary with the revised schedule to be provided to the Provost for his consideration before the end of Trinity Term 2014. Plans to develop additional space within TBSI,
supported by the strategic funding allocation from College, were also noted.

In considering the overhead income as set out, the Committee was concerned to note that the flow of overhead was currently ring-fenced to SFI grants only and requested that TBSI engage with the relevant Heads of School as a matter of urgency to secure an arrangement whereby the appropriate overhead income on grants from other sponsors flows to the Institute to support the costs of the services provided to the relevant PI's.

Having noted the detailed financial position as set out along with the sustainability issues and risks outlined, the Committee invited the Executive and Technical Director to update the Committee in Michaelmas Term 2014 in accordance with College policy on Trinity Research Institutes (TRI's).

(Minute FN/13-14/68 of 19.02.2014 refers)

The Committee considered the circulated memorandum from the Senior ABC/FECP Accountant dated 05.06.2014, which provided revised consolidated GAAP financial projections to 2018/19, including analysis of the projected cumulative College financial position over the five-year period based on key assumptions regarding income and expenditure. Noting the key differences between the current projections and those considered in February 2014, the Committee, considered the Non-EU student number growth scenarios as presented to Board on 28.05.2014 and their impact on overall student numbers and the College’s financial position. The Committee also noted that the anticipated growth in student numbers as approved by Board would not achieve the target of a 2% overall consolidated surplus by 2018/19 and that other income/cost saving strategies would be necessary.
Further noting the main reconciling items between the projected outturn on the College's HEA Funding Statements and the Consolidated GAAP Financial Statements, the projected net depreciation charge and the format of the reconciliation, the Committee requested the CFO to present the financial outturn going forward highlighting the operating performance of the College before the provision for net depreciation. The Committee, noting that depreciation is a real cost, also requested the CFO to prepare a briefing paper setting out the basis for College to prepare its financial forecasts on a consolidated GAAP basis, including the need to make provision for depreciation going forward.

Action
105.1 The financial outturn going forward to be presented highlighting the operating performance of the College before the provision for net depreciation
105.2 The CFO to prepare a briefing paper setting out the basis for College to prepare its financial forecasts on a consolidated GAAP basis, including the need to make provision for depreciation going forward.

However, the Committee expressed concern in relation to student number projections and the risk around uncertain levels of uptake for some courses, and the resulting impact on the projected revenues/approved level of subvention required from College. In considering the updated risk register, the Committee also noted the risk associated with the resources required to deliver the Programme targets for 2014/15. The Committee indicated that any request for additional resources should be directed to the Planning Group.
