

Deloitte Top Technology Talent Competition

Deloitte has launched its 2011 Top Technology Talent Competition seeking ideas from students on how technology can solve a business problem.

TCD's Moonwon Lee won the competition in 2010 for his business plan to develop multi-carrier mobile broadband access. Moon is a PhD student in the School of Engineering working in CTVR under the supervision of Prof. Linda Doyle. Speaking of his experience in the competition he said:

“The competition assesses not only the ingenuity and solidity of your idea but also your written and oral presentation skills to communicate it. To that end, I guess, the greatest virtue of the competition should be to have your idea and your best set of skills judged by a panel of top-class experts, all free of charge. So if you are not sure of yourself, why won't you give it a try this year?”

Moon's entry can be seen here: <http://careers.deloitte.com/uploadedfiles/UK/pdf/Moonwon%20Lee.pdf>

If you are thinking of entering and would like insights into how the competition is run from Moon you can contact him through CTVR at info@ctvr.ie.

Closing date is 11 March 2011

For more information and to enter the competition see:
