

## BT Young Scientist & Technology Exhibition 2011

13<sup>th</sup> – 15<sup>th</sup> January 2011

The Faculty of Engineering, Mathematics & Science is looking forward to taking part in the will BT Young Scientist Exhibition this year. Visit our stand (no 18) in the Industries Hall. There will be lots to see and do and you will have a chance to meet some of our interesting friends including: a Mexican black king snake, a corn snake, cane toads, a horned frog, a giant hissing cockroach, and a Chilean rose tarantula!

Or maybe you could try your hand at **Ghost Hunting!** - Collect evidence of the existence of Ghosts! (photos and audio recordings). Find the ghost floating around you; take its photo and listen to the ghost speaking! You can also take your own photos with the ghosts.

Staff and students from across the Faculty will be there each day to answer any questions you may have about studying at TCD and so if you are thinking of going along – please pop by and say hello!

For further details of the event see: <http://www.btyoungscientist.ie/>
