ST4500 Strategic Information Systems [10 credits]

Lecturer(s):  Adjunct Associate Professor Frank Bannister (frank.bannister@tcd.ie)

Module organisation

Lectures and tutorials

Module description, aims and contribution to programme

To present students with an overview of the business and social impacts of current developments in information systems (IS) and ICT. To equip students to think critically about these impacts and their implications for business and society today and in the future.

Learning outcomes

On completion of this module students should be able to discuss and write critically about the impact of current and emerging developments in ICT on business and government as well as on individuals and society.

Module content

Specific topics addressed in this module will be drawn from a range of topics including, but not limited to,:

- Enterprise resource planning systems;
- Customer relationship management systems;
- Knowledge management;
- IS/ICT management and governance;
- Outsourcing;
