

## **The Rainbow Passage**

When the sunlight strikes raindrops in the air,

they act like a prism

and form a rainbow.

The rainbow is a division of white light into many beautiful colors.

These take the shape of a long round arch,

with its path high above,

and its two ends apparently beyond the horizon.

There is,

according to legend,

a boiling pot of gold at one end.

People look,

but no one ever finds it.

When a man looks for something beyond his reach,

his friends say he is looking for the pot of gold at the end of the rainbow.
