BESS – The Business, Economics and Social Studies Programme (TR081)
Business

We have a host of top international professors and leading business people who engage with the students, challenge them and guide them into top roles in the global business world. Past Trinity Business school students are now leaders in the world of business, government, entertainment, technology, innovation and non-profit businesses, both in Ireland and internationally.

The Trinity Business School retains its place at 1st in Ireland, in the top 16 in Western Europe and one of the top 30 Business Schools in the world, as ranked by the global agency Eduniversal (2014). The Trinity MBA is the number 1 ranked MBA programme in Ireland in both full-time and part-time categories and is in the top 15 in Western Europe.

Political Science

Politics affects us all in our daily lives. It’s easy to think of issues that we all have opinions about. Should government tax the rich to try to achieve greater equality? Should the amount of money the EU spends on the agriculture be cut? How high a priority should third world aid be? Questions such as these, along with analysis of political systems and how democracy works, are at the heart of the study of politics.

Trinity College Dublin is ranked 1st in Ireland, 11th in Europe and 46th in the world for Politics & International Studies (2014 QS World University Rankings).

Sociology

Ireland and the world are experiencing rapid social change. The old world is changing, but what will the new world be like, and how can we participate in its development? Sociology is foremost among the social sciences in studying social change and the consequences of human behaviour. When you study Sociology you will get the opportunity to analyse people and societies, exploring areas as diverse as digitalisation, education, employment, migration and conflict.

Trinity College Dublin’s Sociology Department is ranked 1st in Ireland and in the top 60 in Europe (2014 QS World University Rankings).

Economics

Many of the issues which dominate the headlines are economic problems. Why do a small number of countries enjoy high growth rates? What are the best ways to reduce poverty? Is it possible to pursue economic growth and still protect the environment? Economics blends together theory, data and statistical techniques to help understand economic problems and to make policy recommendations which will hopefully improve the welfare and living standards of our society.

Trinity College Dublin is ranked 1st in Ireland, in the top 40 in Europe and in the top 100 universities in the world for Economics & Econometrics (2014 QS World University Rankings).
Trinity College Dublin

Trinity College Dublin is recognised internationally as Ireland’s leading university and as one of the top universities in the world. Trinity was founded in 1592, and today the university is a vibrant and cosmopolitan community of students from around the world. Its bustling 47 acre campus, in the heart of Dublin, is the ideal environment for studying, learning, relaxing and living.

The pursuit of excellence through research and scholarship is at the heart of a Trinity education. Students learn from inspiring academics who are world leaders in their field. And to help ensure students get the most out of their time at Trinity they are assigned a tutor to provide personal and academic support.

Student life at Trinity College is about so much more than education - with over 200 sports clubs and societies ranging from athletics to tennis, debating to investing and from drama to science fiction there is something to suit every interest.

Why Choose the BESS Programme?

Trinity’s BESS programme is the only university degree in Ireland where students can combine the study of Business, Economics, Political Science and Sociology. The BESS programme offers students a broad-based education in these subjects in the first year and then in the second year asks them to consider what the best combination of disciplines and subjects would be for them. This unique aspect of the programme gives students the time to engage with all four areas and then the opportunity to specialise to a high level in either one (single honor) or two (joint honors) chosen subjects or disciplines.

Degree Options in BESS

BESS is an extremely flexible programme offering ten different degree options: Business (B.B.S.) and nine other single or joint honor possibilities in the disciplines of Business, Economics, Political Science and Sociology. Students have a great deal of choice and flexibility in shaping their degree pathway. For example in second year one student could opt to take Economics only while another student could opt to take Business and Sociology, while a third student could opt to take Political science and Economics. Any combination of disciplines is allowed as per the box to the right.

### Single Honors
- Business
- Economics
- Political Science
- Sociology

### Joint Honors
- Economics and Political Science
- Economics and Sociology
- Political Science and Sociology
- Business and Economics
- Business and Political Science
- Business and Sociology

Course Structure and Assessment

Most BESS modules involve a system of continuous assessment which can include research-based essays, projects and/or presentations, contributing up to 50% of the grade for the year. The remainder is based on the results of written end-of-year examinations.

Within BESS all students take the same modules in first year giving all students the same core grounding in the four disciplines. After this students can adjust their course options to reflect their academic strengths, interests and emerging career aspirations. The BESS programme provides students with a broad-based education while offering a high-level of flexibility in two very important ways: (1) in choosing the specific degree they wish to study for; and, (2) in choosing individual modules.

**YEAR 1**

In the common first year of the programme students are introduced to a wide range of subjects giving them the opportunity to explore new interests without committing to a particular area at this early stage.

**YEAR 2**

Students choose to study one or two of the BESS disciplines, Business, Economics, Political Science and Sociology. Students are also free to choose from a range of complementary modules or even from within the broad curriculum subjects.

**YEAR 3**

Students begin to specialise in depth in one or two disciplines, selecting from an increased number of diverse and specialised modules. In third year, many students have the opportunity to study abroad at distinguished universities around the world such as the ESSEC Business School in Paris, the Chinese University of Hong Kong and Emory University in Atlanta.

**YEAR 4**

Students now focus on the research based development of their core topics as they prepare for their final degree grade. Students may be required to write a dissertation or prepare a case study which provides an excellent opportunity to position themselves for a career in a specific sector or for postgraduate study.
“As is the case with many students I was by no means certain which direction I wished to follow when I filled out my CAO form, but by choosing BESS I ensured that my options were left open as the course splits into 10 different degree options.”

Nick Fitzpatrick, BESS Graduate 2012

“I have acquired a way of thinking, and skills which have set me up for life. Trinity is not textbook learning. It is a combination of academic theories and ideas, applied to what’s happening in the real world.”

Jonathan Orde, BESS Graduate 2009

“I found there to be a great rapport between students and staff, who were always encouraging and supportive of new ideas and entrepreneurial endeavours. The interactive class structures enable students to learn from one another and to develop invaluable organisational, teamwork and leadership skills.”

Donna Hogan, BESS Graduate 2007

Career and Postgraduate Opportunities

From a career perspective BESS is an extremely flexible and practical degree programme. Many BESS graduates have gone on to postgraduate study both at Trinity College Dublin and at other leading universities around the world such as the University of Cambridge, the University of Oxford, the University of Amsterdam, Lund University Sweden and the University of Melbourne.

Graduates are highly sought after by employers, in a range of fields, such as in finance and banking, research, management consulting, teaching, public service, journalism, politics and non-governmental organisations. Graduates have gone on to successful and rewarding careers in varied roles both nationally and around the globe. The following are just a few examples of the diverse organisations that have recruited BESS graduates over recent years:
