

Biodiversity
(or the variety of life on earth)
is essential for human beings

“Our land, water and forests provide us with food, clean water, building materials and other essentials and underpin vital economic sectors such as agriculture and tourism. For those reasons alone we should strive to protect what we have...raising awareness of the issues is a vital step in meeting our objectives and if we can inform and influence the key players, be it farmers, the business sector or the wider public, of the connection between biodiversity and the services they rely on, we will improve the success of the actions we must take.”

Jimmy Deenihan, T.D., Minister for Arts, Heritage and the Gaeltacht, Nov 2011

Trinity Centre for Biodiversity Research

The Trinity Centre for Biodiversity Research (TCBR) brings together researchers from different disciplines whose research is on or relates to biodiversity. Ultimately, our research will be crucial for the development of national, European and international policy and strategic recommendations to ensure global environmental sustainability.

Dublin Biodiversity Audio Tour

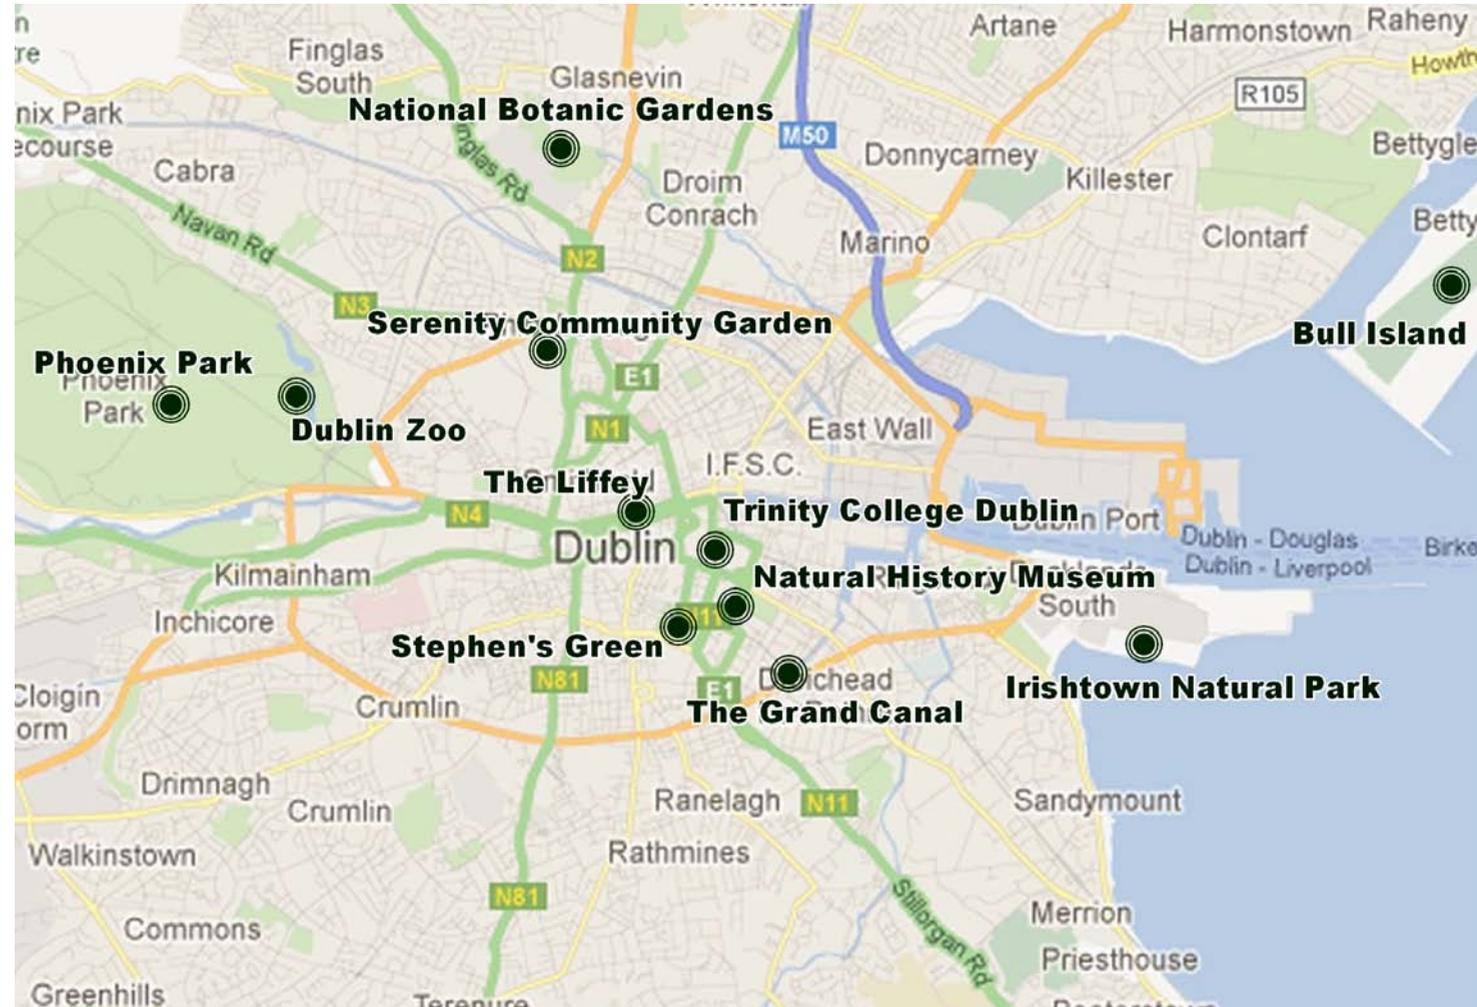

Discover the diversity of nature in Dublin, how it is researched, managed and enjoyed by Dubliners and visitors

The **Dublin Biodiversity Audio Tour (DBAT)** brings together stories on 11 sites of interest to nature-lovers, from community gardens and city parks to collections in museums and botanic gardens.

The DBAT is a series of short, free-to-download pod-cast audio clips. By downloading individual audio files to your personal audio player or smart phone, the Trinity Centre for Biodiversity Research will lead you on a journey of discovery through Dublin.

Whether you decide to visit all the sites, touring between them on Dublin Bus, Luas, Dart, or Dublinbikes, or whether you listen to them from the comfort of your arm chair, we hope you will enjoy finding out more about our green city.
