

# The Biochemical Society

## Speaker Highlight: Prof Dave Hay

### Speaker Biography:

- Research focused on stem cell biology and differentiation for over fifteen years.
- David and his team have highlighted the important role that pluripotent stem cells have to play in modelling human liver biology 'in a dish' and supporting failing liver function in vivo.
- The impact of this work has led to a number of peer reviewed publications, regular appearances at high profile conferences and three start-up companies.
