

The Biochemical Society

Presents: Professor Mihai Netea

Professor Netea is the head of the Laboratory of Experimental Internal Medicine at Radboud University Medical Centre. His research focuses on mechanisms of training of the innate immune system.

Research:

- BCG Vaccination Protects against Experimental Viral Infection in Humans through the Induction of Cytokines Associated with Trained Immunity. *Cell Host Microbe. 2018*
- Metabolic Induction of Trained Immunity through the Mevalonate Pathway. *Cell. 2018*
- The Itaconate Pathway Is a Central Regulatory Node Linking Innate Immune Tolerance and Trained Immunity. *Cell Metabolism. 2018*
- Modulation of Myelopoiesis Progenitors Is an Integral Component of Trained Immunity. *Cell. 2018*
