How we can support you
How we can support you
ENABLING YOU TO FULFIL YOUR POTENTIAL
The Trinity Careers Service supports you to explore and plan for your career ambitions. We can help you to identify and articulate how your learning experiences, both in the classroom (through your programme) and outside (through your co- and extra-curricular activities), contribute to your career readiness and your intellectual and personal development giving you the ability to contribute to the workplace of the future.

WE ARE AN ALL-INCLUSIVE SERVICE
We operate an inclusive policy and our services are available to all. Don’t hesitate to give us a call or drop into our offices with any questions you might have.

Our Employability and Employment Guide sets out how Trinity supports your development and prepares you for your career ahead. Find out more about the Trinity Careers Service at www.tcd.ie/careers

Contact us
Trinity Careers Service

“The speakers were very clear when communicating, very knowledgeable and very open to questions

Book a practice interview to improve your skills and get some tips
How we can support you

JANUARY – JUNE

- Meet interesting employers from many different sectors
- Discuss issues, options and opportunities with experienced experts
- Trinity Employability Award celebration events, announcement of Laidlaw Scholars and Bursary Award Winners
- Careers Bootcamp! Our popular summer bootcamp, a 2 day event with lots of different workshops will be returning in April/May
- Grad Ireland Summer Fair - 5th June 2020

Log on to MyCareer for up-to-date information on events.

ONGOING

- Employer Visits
- Weekly CV & LinkedIn Clinics
- Practice Interviews
- One-to-One Guidance Sessions
- Application Support Sessions

Book a one to one appointment for support with graduate programme applications or guidance on planning for the coming year.

It was interesting to hear the questions of other students, and how the panellists responded to them.
Support and advice tailored to your needs

We are home to a diverse and multicultural community and welcome students from all backgrounds and places. Our international students represent over 120 different nationalities. The process of looking for a job or postgraduate programme can be quite daunting, especially as it may be very different from that used in your home country. But we are here to help! If you are an international student, you can find plenty of specific help and advice at the Careers Service.

Careers services

Our Careers website (www.tcd.ie/careers) includes a comprehensive section for international students. This includes information on working in Ireland or abroad, work regulations in Ireland for international students, information on recruitment procedures and links to helpful websites.

You can access vacancy information and details of all term-time events and presentations, including recruitment visits from global employers. And there is Trinity CareerGate, which is also an excellent resource for your international job search.
Working in Ireland during your studies and after graduation

Students attending a recognised course of at least one year leading to a recognised qualification are allowed to work for up to 20 hours per week during term or 40 hours per week during holiday periods.

After you graduate, you are eligible to work for one year full time in Ireland under the 1G visa if you graduate from an undergraduate degree, and for 2 years if you graduate from a Masters or PhD programme.

Marketing yourself to employers

There are many ways in which an international student or graduate can be of benefit to an organisation. Employers value the qualities you can offer – such as fluency in different languages, highly developed technical skills, awareness of foreign practices and markets, and cultural awareness. They also appreciate employees with a different perspective, which can lead to innovative and creative solutions to organisational issues. It is worthwhile spending some time thinking about how you can stand out from the crowd by emphasising your international repertoire of skills.

For students without a strong support system this service is very useful. Explaining intentions and plans in person to someone competent helps expose holes which I could have otherwise missed.

EXPLORE YOUR CAREER OPTIONS
YOUR CAREER JOURNEY
FROM FRESHER TO FINALIST.... AND BEYOND
During your time as a Trinity student, you can come and meet with us in the Trinity Careers Service to discuss how you can start preparing for your future career. Check out our website (www.tcd.ie/careers) to find out more and remember to register with MyCareer.
Successful careers don’t just happen. Start your career by planning early and make the most of the opportunities on offer at Trinity.

**Junior Fresh**
- Register with MyCareer to keep up-to-date with careers events and job vacancies
- Visit our website (www.tcd.ie/careers) to find out how we can support you
- Join clubs and societies and get volunteering (www.studentvolunteer.ie)
- Create your new 3rd level CV so you are ready to apply for exciting opportunities
- Apply for work experience – the best way to figure out what you want to do

**Senior Fresh**
- Visit our website to see how we can help you find work and make job applications
- Tailor your CV and apply for work experience and summer internship opportunities
- Consider applying for the Trinity Employability Award, the Laidlaw Undergraduate Research and Leadership Programme and other bursaries
- Build on your experiences and try new things that challenge you
- Use LinkedIn and Trinity Alumni Online Mentoring to be inspired by the success of Trinity graduates
**Journey at Trinity**

**Junior Sophister**
- Use our online careers tools to help you find out more about yourself to inform your career choice
- Meet your Careers Consultant to discuss your strengths and explore your options
- Reflect on what you enjoy and organise new experiences for the summer
- Consider taking on a leadership role e.g. officer in a society, Class Representative
- Attend Trinity mentoring events to meet with and talk to experienced graduates
- Find out what you need to know to prepare and plan for your final year

**Final Year and Postgraduate**
- Meet with your Careers Consultant to discuss your career strategy for the year ahead
- Attend Careers Fairs and events that interest you
- Know your deadlines for applications
- Engage with mentors and fine-tune your CV and LinkedIn profile
- Continue to be curious, talk to everyone you can and think BIG

Our *Employability and Employment Guide* sets out how Trinity supports your development and prepares you for your career ahead.

Find out more about the Trinity Careers Service at [www.tcd.ie/careers](http://www.tcd.ie/careers)
As a PhD student, you can sign up for the Trinity Careers Service/Student Learning Development 5 ECTS generic skills module ‘Planning and Managing your Research and your Career.’ This will provide you with the opportunity to develop research, career management and employability skills and the chance to interact with other PhD students from across Trinity to share experiences and strategies.

To complete the module and receive credits, students need to select and attend 13 x 2 hour workshops and complete a number of related assessments.

Workshops cover topics such as:

- Planning & Time Management
- Career Planning & Building on Strengths *
- Effective Teamwork
- CV Preparation *
- Developing Critical Writing Skills
- Effective Presentation Skills
- Thesis Writing Process
- Interview Skills *
- Networking *
- Viva & Oral Defence Preparation
- Stress Management

* Trinity Careers Service workshops
BEING THE BEST VERSION OF YOU!

No matter what stage you are at, or what you plan for your future, there are principles you can embed into your everyday life, both in college and out, to ensure your future is bright.

To discuss this further, consider setting up a one-to-one meeting with your Careers Consultant. Book an Appointment through MyCareer.
CAREER PLANNING 101!

Know Yourself
- What do I want from my career?
- What do I offer in skills, abilities, and knowledge?
- What am I interested in? What am I passionate about?
- How would I describe myself? How might others describe me?
- Am I open to new ideas and experiences? How curious am I?
- How good am I at monitoring my own emotions

Explore Opportunities
- What jobs and employers are out there?
- What sectors are hiring at the moment?
- What aspects of my work experiences to date have I enjoyed/not enjoyed? Why?
- Who do I know in the working world who can help me?
- Do I need a postgraduate qualification to get into this field?
- What impact/contribution did I make in each of my experiences?

Log on to MyCareer and www.tcd.ie/careers for updated vacancies, occupational and industry information (follow us on Twitter and Facebook)

Other graduate websites: www.gradireland.com targetjobs.co.uk

Careers directories such as gradireland and the Times Top 100 Graduate Employers (UK)

Various recruitment websites

Global online newspapers, LinkedIn groups and Twitter feeds

Careers Information Centre

Careers talks and alumni events

Employer presentations and fairs

Work experience and internships

Mentoring through the Alumni Mentoring Programme (JS/SS Students).

You are likely to change job, role, position and even DIRECTION several times in your working life.

Our advice to you is to try and hit a healthy balance between planning your next steps and being open to possibilities and opportunities.
Make Choices

- How do I tend to make important decisions?
- Which career options are a priority for me? Why?
- Do I have a contingency plan?
- Who or what got me interested in this area?
- What are the practical considerations that apply to me? e.g. budget, time, energy, location etc.

Take Action

- Is my CV and LinkedIn profile well tailored to my sector of interest?
- When is the next drop-in CV Clinic?
- Do I need to book a practice interview?
- Which careers workshops will help me most?

Take full advantage of resources outlined:

- Career Workshops
- Individual meetings with your Careers Consultant
- Range of resources available including free access to Profiling for Success tool at www.tcd.ie/careers.

Further information

- Check out the Resources section of www.tcd.ie/careers
- Make an appointment with a Careers Consultant to help you work through your options
- Use ‘Profiling for Success’ free career planning tool for Trinity students on MyCareer
- Attend Trinity Career Fairs to engage with employers and course providers.

- The Careers Service Workshops & Webinars
- Practice interviews on video
- Drop-in CV/LinkedIn clinics
- Practice selection testing online
- Finally... keep in contact with the Careers Team and help other students plan their careers in the future.
Internship programmes
These are structured work experience programmes where students receive supervised, practical experience in a course-related area and usually last 4 to 12 weeks during the summer. Internships are a great way of helping to clarify your future career path and to build a network of contacts. Log on to MyCareer to find opportunities.

International work experience
More and more students are travelling abroad during the summer months to gain career-related work experience. Organisations such as BUNAC, IAESTE, Léargas, TECS and USIT have long-established work experience, exchange and summer camps opportunities, which provide valuable summer experiences. Log on to MyCareer to see international vacancies.

Part-time work
Part-time work can be much more than a way of earning a bit of spare cash. Make sure all your work experience counts by thinking about all the skills you have gained. For example:

- Part-time work in the service industry can develop interpersonal and customer service skills, and possibly organisational and financial management skills too.
- Community and voluntary work experience can reveal your commitment to a cause, social conscience and ability to self-motivate. In addition, many voluntary organisations offer high-quality training to participants, but remember your commitment to them as a result.
- Basic or routine jobs give you an insight into the way organisations are run and how people are managed. Perhaps you have thought of ways that things could have been done differently?

WHERE TO LOOK
Some part-time vacancies are advertised on MyCareer. However, the Student Union Jobs list specialises in this type of work. For more information www.tcdsu.org/jobs. Keep your eye on gradireland.com for vacancies too.
Improve your language skills
As a Trinity student, you have access to the language laboratories at the Centre for Language and Communication Studies (www.tcd.ie/slscs/clcs/llc) and a range of language modules available under Trinity Electives (https://www.tcd.ie/trinity-electives/apply/) and a range of cross-faculty broad curriculum courses (www.tcd.ie/broad_curriculum).

Research opportunities
Many academics and research groups take on students over the summer to help with their research. These positions are sometimes advertised through funded programmes, but it is also worth approaching researchers in your area of interest to explore opportunities. Check out our Laidlaw Undergraduate Research and Leadership Programme at www.tcd.ie/careers/laidlaw

Volunteer work for charitable organisations
Commitment ranges from a few hours a month to a full-time residential commitment over the summer. Voluntary opportunities vary from conservation to retail work, administrative to helpline work, and youth work to caring for the elderly. Training is often provided by the organisation. See www.tcd.ie/community to learn more.

Work shadowing
Observing a professional’s working day is a great way of gauging your interest in a particular profession. Research the possibility of work shadowing with contacts from family, friends, college, or speculatively by pinpointing an area in which you’re interested and researching this possibility further.

Employer visits and courses
Some organisations offer a chance to visit their premises through an open day or may hold educational seminars or short courses (typically 1–3 days), mainly during the academic year.

Self-employment
Involves a lot of hard work! Working 9–5 is usually not possible; however, the autonomy and success may outweigh the demands. Though most pursue self-employment after their studies, some students have been successful in setting up their own enterprises concurrently.

Further information
- MyCareer – for information on work experience internships and much more
- Trinity Career Gate, includes details of worldwide internships
- www.tcd.ie/community – information on the various benefits of volunteering to you and the community, and the variety of opportunities available

Clubs and societies
- Central Societies Committee (www.trinitysocieties.ie)
- Dublin University Central Athletics Club (www.ducac.tcdlife.ie)
Since its introduction in 2016, the Trinity Employability Award has given students learning experiences that contribute to their development of the Trinity Graduate Attributes – to act responsibly, to think independently, to communicate effectively and to develop continuously - which improve their overall career readiness.

Running from September to March annually, this dynamic award combines industry-led training in specific transferable skills with university-led workshops to help students prepare for the ever-changing challenges of the 21st century workplace.

Students are supported to reflect on and articulate their learning from their participation in the award and are given the opportunity to compete for prizes.

Three award programmes will be open for applications in September 2019: the Trinity Employability Award in partnership with Intel, the Professional Services Pathway Award and a new Pharma Pathway Award.

This award programme in partnership with Intel allows students to gain an insight into real world applications of their skills and knowledge in the engineering and technology sector.
Trinity Careers are delighted to present this exciting and innovative scholarship designed to help undergraduate students from all disciplines and walks of life to develop strong research and leadership skills which will allow them to excel in both their degree programmes and their careers. The programme is sponsored by Lord Laidlaw of Rothiemay and comprises of two elements:

**Leadership Training**
Online learning, one-to-one mentoring, and residential weekends and training workshops with leadership experts. An intensive programme with emphasis on personal development, self-awareness, resilience, and communication skills.

**Research Project**
Two periods of research of five weeks each carried out over two consecutive summers during which time participants will pursue and report on an original, self-defined research question, with the support of their academic research supervisor.

Scholars each receive a stipend of €550 per week for the 10 weeks of their research project. There is also a travel fund available to help with research activities that requires travel beyond Trinity.

**Trinity Alumni Spring Week Internship Bursary**
www.tcd.ie/Careers/students/awards/springweekbursary.php
The Trinity Alumni Spring Week Internship Bursary was initiated in 2016 to support costs for talented undergraduate students who secure spring week internships with leading professional services firms. This bursary is open to Senior Fresh students of any discipline and is financed by two Trinity alumni donors.

Students in their Senior Fresh year in any discipline who secure a spring week internship may be eligible. Each successful bursary recipient receives a monetary donation to cover expenses on their internship week. Applications open in December each year.

“I am currently undergoing my research and my supervisor is being wonderfully supportive and accommodating. I could not ask for more. The entire experience of the scholarship so far has been incredible.”

www.tcd.ie/Careers/students/awards/laidlaw.php
The Laidlaw Undergraduate Research and Leadership Programme

**DEVELOP YOUR SKILLS**

Your time in Trinity is an opportunity to gain a variety of skills to complement your academic study. Taking part in co- and extra-curricular activities can play an important role in your career development. Employers value a diversity of experience and skills, and expect graduates to bring a rich portfolio of competencies to their organisation. This can help you stand out in the hiring process.

Activities which help you explore your interests and develop career-ready skills could include taking part in Trinity clubs and societies, getting involved with the Students’ Union, participating in mentoring programmes where you can get advice from Trinity alumni, developing your own business idea or undertaking internships or voluntary activities.

Whatever activities you choose, it is worth taking some time to reflect on skills you have developed. This will allow you to assess your strengths and areas for development, as well as providing valuable evidence to use on applications forms or in interviews.

**Explore your career options**

**Trinity Electives**
As a Trinity student you may have the option to broaden your Trinity Education and expand your skillset by choosing a Trinity Elective, a stand-alone 5 ECTS module outside of your core discipline. You could choose to engage in Trinity’s ground-breaking research, explore languages and cultures, or address key societal challenges. The full list of Trinity electives is available at [https://www.tcd.ie/trinity-electives/](https://www.tcd.ie/trinity-electives/)

**EMERGENCE OF TECHNOLOGIES**
**THE ART OF THE MEGACITY**
**ENERGY IN THE 21ST CENTURY**

**DESIGN THINKING**
**IDEA TRANSLATION LAB**
**FROM PLANETS TO THE COSMOS**
**JAPANESE LANGUAGE AND CULTURE**
Volunteering
www.studentvolunteer.ie

Volunteering can be a rewarding opportunity to contribute to the community, develop a range of skills and increase your confidence. Whether you are the chair of a society, write the odd article for one of the Trinity publications, or volunteer with the elderly, you are gaining valuable transferable skills: the benefits of volunteering are countless and it can offer emotional, physical and professional gains.

An added benefit is that employers look favourably on candidates who have volunteered. It is a good way to try out certain skills that are not included in your course of study. You can enhance your application forms and CV with the skills you have learned and contributions you have made while volunteering. You can also apply to have your volunteering recognised through the Dean of Students Volunteer Awards (see the Civic Engagement Office website) or through the Trinity Employability Award.

There are a huge range of volunteering opportunities to choose from in Trinity with initiatives such as Student2Student (S2S), the Voluntary Tuition Programme (VTP), Suas and others. Many of these opportunities are listed at the Careers website (link to https://www.tcd.ie/Careers/students/options/develop/volunteering.php) and the Central Societies Committee (http://trinitysocieties.ie/)

Entrepreneurial activity
Trinity fosters innovation and entrepreneurship at all levels across the university. As a result, the university has established Tangent, Trinity’s Ideas Workspace (https://www.tcd.ie/tangent/). Tangent offers undergraduate and postgraduate certificates in innovation and entrepreneurship and accelerators such as LaunchBox to support entrepreneurially-minded students.
Career mentoring is a relationship between a student (‘mentee’) and a more experienced person (‘mentor’), who is there to support you with developing your career. The purpose of the relationship is the passing on of knowledge, experience and offering advice.

Mentoring at Trinity is a unique opportunity for you to learn about professional life in a broad range of sectors.

Your Trinity alumni mentor could be working in any area that interests you or have graduated from the same course as you. Mentors can help with preparing for the world of work, discuss career options and offer practical assistance with getting jobs and a place on a postgraduate course.

You can engage with mentors in two ways. Keep an eye on your School and Trinity Careers Service Events pages for specific dates.

Option 1:
Register to attend a Mentoring Launch event and attend a briefing with the Careers Service prior to the event. This is a structured mentoring programme where you can aim to meet with your mentor three times for approximately one hour each time during a six month period. We encourage undergraduate penultimate and final year students to choose Option 1 in term time.

Option 2:
This option is for students of all disciplines, both undergraduates and postgraduates, at all times of year. Register with Trinity Alumni Online Mentoring, connect with Trinity alumni and ask career related questions. If you wish, request a mentor.
MENTORING TIPS FOR MENTEES

**Have a plan**
- Be realistic in your expectations of how much time and support your mentor will give you.
- Your mentor’s time is valuable - follow through with appointments made; avoid sending too many requests in a short space of time and try to make progress independently in the times between your conversations.

**Set objectives together**
- Mentoring is most effective when it has a clear set of goals that it can be directed towards, especially early in the relationship.
- If you do define objectives, make sure you review them regularly together. Be sure to acknowledge what you have achieved together and what the next steps should be.

**Take the lead**
- As a mentee, you are expected to lead the mentoring relationship and make sure it keeps progressing. Your mentor is your guide and helper.
- Remember to be proactive - request their help when you want it and keep them up to date with your progress.
exploreyourcareeroptions

career myths

Myth 1: I’ve got to get my career choice right first time
Fact: It is likely that you will experience five to six career changes in your lifetime and will have many career choices to make.

Myth 2: There is only one perfect job for me
Fact: There are many jobs that you can do. It is useful to stay open so you don’t miss out on interesting opportunities.

Myth 3: Everyone knows what they want except me
Fact: We have no idea what other people are truly experiencing. We are all different; a meeting with your Careers Consultant can help you figure out what you want from your career.

Myth 4: If I wait long enough, my career will fall into place
Fact: Being passive is unlikely to secure you the job that will fulfil you. By being pro-active, you ensure that you are ready for opportunities as they arise.

Myth 5: I don’t know anyone in the area I’m interested in
Fact: You do! And you will soon know more if you get on LinkedIn, connect with Trinity alumni, and talk to everyone you come in contact with.
7 ways to prepare for the world of work

1. **Clean up your act**
   CVs with no spelling mistakes. Social media accounts brimming with achievements and devoid of incriminating photos. A positive mental attitude. It all counts.

2. **Stand out from the crowd**
   Employers receive hundreds of applications from excellent candidates with strong academic achievements – why are you different? What can you offer to this employer that others can’t?

3. **Research the company**
   Make sure you know about the company’s clients, products and services as well as about their culture and values. Find one extra statistic about the company that other candidates might not know – and talk about it at interview.

4. **Use your network**
   Ask people with industry experience for key insights and golden nuggets of information. Then show your interviewer you have current market knowledge.

5. **Ask for feedback**
   There are many reasons why you won’t get a role, but always ask for feedback so you can prepare better for the next interview. You’ll gain honest and independent information about yourself as a candidate and about what employers look for in their new hires.

6. **Ready and resilient**
   Show up on time, dress to company policy, prep for meetings, meet deadlines, ask questions. If you have a bad day, reflect on the experience but move on quickly and take with you what you learned.

7. **Remember your Trinity graduate attributes**
   These are lifelong skills you have worked hard to attain at university. Keep them in mind and you’ll always be successful.
Finding work & making applications

Finding work & making applications

Becoming informed on your sector of interest and knowing which organisations recruit when is key to finding opportunities.

Being knowledgeable about the sectors in which you would like to work can increase your chances of finding opportunities. This section gives you a strong foundation from which to begin your job search.

**Research opportunities**
For regular updates about job opportunities and careers events, keep an eye on our website, which is updated daily with new events, vacancies and study opportunities relevant to all sectors. Read weekly email updates highlighting new events and vacancies. The ‘Your Degree... What Next?’ section offers information on the areas in which graduates of your discipline and course have been successful in the past.

**Type of Events**
Attend our sector specific Trinity Fairs (details on pages 9) and our employer led events to ensure you are meeting employers. These events provide a great opportunity for you to gain first-hand knowledge about companies and what they are looking for in prospective employees.

National and international employers make visits to the university or local venues, usually during both Michaelmas and Hilary terms. Companies give short employer presentations about their businesses and the range of graduate opportunities that they have available. While accountancy and law firms tend to advertise for final-year students interested in trainee vacancies in October, other sectors such as retail and finance advertise throughout the year.
Finding work & making applications

Checklist for Careers Fairs

- Look up the list of companies who are attending – research who they are and what they do
- Prioritise who you want to meet – go to these stands first
- Introduce yourself and let the recruiters know you have researched the company
- Ask questions e.g. requirements, recruitment process, closing dates, career progression
- Tell them about your skills, experience and career aims
- Offer them your CV if appropriate
- Freebies – don’t just grab and run, take the time to speak to the company
- Thank them for their time.

Be creative
Even if you know what you want to do and check websites and newspapers regularly for vacancies, you may not find many suitable jobs. Many positions are not advertised as ‘graduate’ jobs, yet they may need the skills of a graduate to do them – and you can often progress quickly in a company by taking the initiative and demonstrating your skills.

Smaller organisations may not offer structured graduate training programmes, yet learning on the job can often be the best way to progress and you will experience a wide variety of responsibilities.

Networking

Networking is the most effective method for increasing your chances of finding work and is one of the most important career development activities in which you can engage. Some reports suggest that at least 60% of all jobs are found by networking.

What is networking?
Networking is not about asking for a job! It is about identifying and connecting with people who may be able to help you by sharing their insight, advice and experience. You might be able to return the favour by helping them in some way, or you could pay the favour forward by supporting a graduate in their early career once you have begun your own career).

By developing a strong professional network you will:

- Find out about opportunities that may not be advertised
- Acquire insider information on organisations and companies that will be invaluable during the application process.
- Make you and your aspirations known to as many people as possible so as to achieve your goals.
Finding work & making applications

How to develop your network
You already have a network of people who potentially could help you.

- Your family and friends (and their family and friends)
- Your classmates (and their family and friends)
- Your lecturers, tutors and other college staff
- Trinity alumni (including the mentoring programme)
- Previous employers and work colleagues

When looking for work it is important that you let people know what you are hoping to do and what you have to offer. If you want to find out about a particular sector but don’t know anybody in that area, ask the people in your network if they know someone in the sector work who could be approached for advice. Once you are given a contact name, the next step usually involves either meeting the contact face to face to have an informal informational interview or exchanging emails with them.

In these situations it is not appropriate to ask someone directly for a job. Your aim should be to make a connection and get some helpful insights and information about their job and the sector they work in.

Where to find opportunities

- MyCareer
- gradireland.com
- http://trinity.careergate.ie/International Opportunities
- www.irishjobs.ie
- LinkedIn
- www.targetjobs.co.uk Graduate jobs in the UK
- www.jobs.ac.uk UK and Irish posts in Higher Education
- www.epso.europa.eu Careers in the European Union
- See the “Your Degree... What Next?” section at www.tcd.ie/careers for recruitment websites in your area of interest
- Keep up to date with news relating to your sectors of interest through newspapers, websites and social media.
Many students choose to go abroad during summer vacations or after graduation to work and travel. Working abroad can be a great way to build your confidence, improve your intercultural skills, sharpen your language skills, and expand your network across borders. From unpaid volunteering through to paid work, there are many options to consider.

Research work opportunities
Find out what student societies such as IAESTE and AIESEC have to offer to help you access short-term experience. In your final year, pay attention to graduate programmes offered by IBEC or Enterprise Ireland for example, which both have an emphasis on export marketing with the opportunity to gain a postgraduate qualification.

Other opportunities to work further afield may arise through teaching English as a foreign language (e.g. the JET programme in Japan), or through the graduate programmes of global multinationals such as the Jameson Graduate Programme or global professional partnerships.

Some international organisations run competitions for administrators and specialists, usually with experience. For those newly graduated with linguistic ability, internships or traineeships are on offer, such as the EU Commission’s traineeships (www.dfa.ie/eujobs/traineeships/). USIT also offers access to various international work experience/internships and work and travel programmes.

Know the protocol
CVs, applications and interviews are different in every country. To give yourself the best chance of success in your international job search, you need to adapt your job search to local expectations. Investigate the Careers’ ‘Work Abroad’ section on our website www.tcd.ie/careers, which includes the resource with information on country-specific requirements and ‘Trinity Career Gate’ for international opportunities.

Market overseas experience
You can develop many skills when living and working abroad, including intercultural awareness, planning and organisational skills, time and budgetary management, and independence. Be sure to articulate this in your applications for jobs or courses on your return.
Finding work & making applications

Timing
Take time to consider what you may do on your return. If you are intending to apply for a taught postgraduate course or graduate recruitment scheme, find out about the deadlines for applications and the process of selection, as it may affect your travel itinerary. Keep in touch with your networks and up to date with job opportunities by logging on to our website MyCareer.

Similarly, if you are considering undertaking a Ph.D., research the funding options and deadlines before you travel overseas. It can be difficult to find the time to put together a strong proposal or funding application while travelling, so it can be helpful to have all the necessary documentation completed in advance of your summer abroad.

You can develop many skills when living and working abroad, including intercultural awareness, planning and organisational skills, time and budgetary management, and independence

Volunteer overseas
Volunteering overseas during the summer can give you the opportunity to combine travel with giving back. There are hundreds of organisations offering overseas volunteering experience, of differing quality. Do your research and try to speak to others who have volunteered abroad to see what organisations they would recommend. Check out Trinity’s guidelines on international development volunteering and service learning, available at www.tcd.ie/community

Useful websites to source international volunteering opportunities include: www.idealista.org, www.devex.com and www.reliefweb.com

Irish Aid facilitates the recruitment of UN Youth Volunteers interns (www.irishaid.gov.ie).
PERFECTING YOUR CV AND COVER LETTER

How to make a recruiter want to meet you

What should you include in a CV?

An effective CV is one that showcases your skills, knowledge and experience that are relevant to the role. The following sections should be included:

PERSONAL DETAILS
Full name, current address, accessible contact number (usually your mobile number), a professional email address and your LinkedIn profile URL, or your Github if relevant.

CAREER OBJECTIVE / PERSONAL PROFILE (OPTIONAL)
In this section you should reference your relevant experience briefly including highlighting key skills, and confirm your interest in a particular job or employment sector. This section should not be more than 4 or 5 lines long.

SKILLS PROFILE (OPTIONAL)
Your skills profile should include a list of concrete skills, such as language or technical skills. Avoid listing generic skills such as team work and communication skills unless you also provide evidence of where these were developed.

YOUR PERSONAL CIRCUMSTANCES
If you are a mature student, a student with a disability, someone who repeated a year, or if you have some other consideration, your Careers Consultant is here to assist you in presenting your experience to its full potential. Make an appointment by logging on to MyCareer.

Finding work & making applications

Your CV is your first point of contact with an employer, and it’s important to make a positive first impression. Employers receive a high volume of applications, so their first job is often to find reasons to dismiss applications and have fewer applications to read through in detail. In a competitive market, your CV could be put into the “no” pile for reasons which may seem minor but are in fact incredibly important.

Make sure that there are no spelling and grammar mistakes, and to spend time on the overall look of your CV so that it is easy for an employer to navigate. Misspelled words, poorly written content and an untidy layout all indicate a lack of attention to detail and professionalism.

Take the time to go through your CV in detail and make sure it creates a positive impression. As it takes about 6 seconds for employers to decide whether they will look into your application further, you need to include your unique selling points on first page of your CV to attract employers’ attention.

For those seeking a career in academia, teaching or research, possible headings may include postgraduate dissertation or research abstracts.
Education and qualifications
- Your education should be presented in reverse-chronological order. If you are looking to show your in-depth knowledge about any particular subject, include your projects or thesis which evidence this
- Show your overall grades and the breakdown of subjects within your degree relevant to your application, but don’t include all your subjects. List the four or five modules that are most relevant to the role
- Leave out your Junior Certificate
- Include your Leaving Certificate but do not include information about points achieved or individual subjects taken

Employment history
- Your experience should be presented in reverse-chronological order
- Where relevant, you can split your experience into 2 sections: Relevant Work Experience (highlight first) and Other Work Experience
- Include employment dates, your job title and the name of the organisation you worked for in each role
- Emphasise both what you have learned and how you have made a difference to your employer, and talk about achievements at the workplace. Quantify where possible e.g. “Taught English to groups of up to 25 adult learners”
- Emphasise the skills gained in each job and make it clear where you demonstrated these skills

Volunteering
- Your volunteering experience should be presented in reverse-chronological order
- Include dates you were involved, a role title, and the name of the organisation for each position
- Your experience whilst volunteering may not be directly related to your future job. If you have demonstrated transferrable skills in your volunteer work make sure to explain this, with supporting evidence

Interests and activities
Mention any positions of responsibility that you have held in societies or clubs in Trinity or in any outside organisations. Outline any tasks you undertook which provide evidence of skills development.

Referees
Get permission before you use someone as a referee. For jobs in the private sector you can include academic or work references. For postgraduate programmes you are likely to require two academic referees. Include their name, job title, employer and location.
## Covering letter

- **Reasons for interest in job**
- **Highlights skills relevant to job**
- **Details relevance of academic background**
- **Positive and confident summary and ending**
- **Remember to sign the letter**
- **Demonstrates interest in the organisation**

### 16th May 2018

Jane Anne Smith  
46 Ballysimon Road  
Dublin 6  
Mobile: 085 231909  
smith@tcd.ie

**Dear Ms Griffin,**

**Re: Audit Trainee Vacancy AT1903**

I am writing to express my interest in the role of Audit Trainee advertised on the X website. I am in my final year of a Mathematics degree at Trinity College and I am very keen to build a career in audit.

My academic background in maths has equipped me with the analytical, numerical and critical thinking skills to carry out this type of work. I know from speaking with several of your employees at the TCD Careers Fair that you are looking for self-starters with leadership potential, and I believe I fit this criteria as I have taken the initiative in several group projects at Trinity. I have also gained practical experience during the summer as a Finance Intern in XX company which confirmed that this is the sector in which I want to build my career.

I am involved in the Maths Society in Trinity College Dublin as an Event Manager which has involved networking extensively to identify and secure suitable speakers for our society events. I believe these skills would be very useful when dealing with clients during the audit process.

I am interested in working at company XX because I know there is a lot to learn to become an audit professional and I know you offer excellent in-depth training and career development opportunities to your staff. I am also impressed by your corporate social responsibility strategy and the support you give to local community organisations whilst promoting team spirit within XX.

I would welcome the opportunity to discuss my application with you at interview. Please find attached my curriculum vitae.

Yours sincerely,

Jane Anne Smith

---

**Notes**

- Unless you are applying to a creative organisation, where a more creative and visually interesting approach may be used, your letter should be laid out in a business-like and formal manner.
- Your covering letter should cover only one side of A4 paper. Do not include pictures, patterns or borders.

---

ie.linkedin.com/in/janesmith

Summary
An English, French and Spanish speaker with experience in customer service and relationship management developed in the retail and manufacturing sectors. Excellent leadership and organizational skills developed through involvement with sports and college societies. Looking for an opportunity to contribute to an FMCG company expanding in international markets.

Education
2014 - 2018
Bachelor of Arts in European Studies
The University of Dublin, Trinity College
Relevant Subjects: French, Spanish, European History, Politics & Sociology
Results: Expected Result 2.1
Project: 'The Spanish Catholic Church during the Dictatorship of Francisco Franco – Collaboration to Opposition'. Conducted extensive research in both Madrid and Alcalá de Henares and interpreted and analysed primary Spanish sources.

2008-2014
Leaving Certificate
Cadbury College, Co Roscommon

Employment History & Experience
Summer 2017
Production Operative
Hewlett Packard
- Consistently met production targets and deadlines.
- Completed an analysis of rejected product for the Quality Control Manager, which resulted in a 7% improvement in quality levels.
- Entrusted with training new operatives within three weeks of starting the role.

Summer 2015
Sales Assistant
Tower Records
- Developed excellent customer service skills through interacting with clients.
- Accurately processed a high volume of payments
- Assisted the Store Manager with stock take and ordering goods

Summer 2014
Commercial Loans Clerk
First Active
- Developed excellent customer service and telephone skills.

Only your name and contact information should be provided. Do not include a photo, your age, date of birth, marital status or nationality unless the nature of the job requires this information and you are comfortable sharing this.
Provide your up-to-date email address and include your LinkedIn account if it is well developed.

Introduce yourself to the reader, refer to your relevant skills and specify why you are sending your CV. This section is optional and should not be more than 4 lines.

Present information in reverse chronological order and specify a few of your modules if relevant to the role.

Only include information about projects if relevant to the role.

Can be separated into 'Relevant Work Experience' and 'Other Work Experience'.

Well designed, easy to read. Lots of white space makes it attractive.

Only subjects relevant to the job applied for are listed.

CVs get more attention when skills are described in action. Figures add credibility and show you are effective.

SOME SAMPLE
CV STYLES
Achievements

Academic
Awarded the scholarship for the "XX" nomination 2014

Extra-curricular Activities

2017-present
secretary
Trinity College EUROPA Society
- Organise debates within and between universities.
- Promoted events at which high-profile international speakers presented.
- Ensure smooth running of up to 10 events a year within strict budget, which are regularly attended by up to 200 students.

2015-2017
secretary
Trinity College Hockey Club
- Scheduled and organized the annual training sessions.
- Managed and organized 4 intervarsity competitions and many successful social functions.

Additional Skills

IT
Proficient at MS Office applications and Adobe Photoshop

Languages
Good written and spoken French

Interests
Sports
Actively involved in hockey, demonstrating an ability to motivate team mates.

References
Professor John Patrick Jones
Lecturer
Department of Hispanic Studies
Trinity College
Dublin 2

Mr. Paul McCormack
Operations Manager
Hewlett-Packard
Liffey Park Campus
Co Kildare

Highlight additional skills. Provide examples of where the skills were developed.

Provide name and dates for awards, qualifications and competition. You can also categorise your achievements e.g. academic, sports, work.

This CV categorises your experience and education according to your skills and achievements.

Different parts of the degree are emphasised to make it more focused towards a specific career.

Bulleted achievements with clear descriptions. Bullet points are easier to read than paragraphs of text.

It shows you are not only active but effective too.

Include 2 references. If you run out of space, you can say 'Available upon request' instead.
Employers are looking for evidence that you are a suitable candidate, so when completing an application form for an internship, a full-time position or for postgraduate study, ask yourself ‘Why are they asking this question?’, ‘What can I tell them to show that I am what they are looking for?’

**Preparation**
Before you fill in the form, study the advertisement carefully to find out what the skills and person requirements are, so that the profile of your skills and qualities matches the specification as closely as possible.

As with all aspects of the job search, preparation is the key. Research the employer/course provider and, where relevant, attend presentations to get a flavour of the organisations you are most likely to target. Alumni can be a good source of information. Search Trinity’s LinkedIn Alumni page and the Trinity Alumni Online Mentoring platform to identify Trinity graduates working in the organisation you are targeting. Where there is little information to go on, look for a generic job profile of the position you are applying for, available on one of the graduate careers websites.

**Skills and competencies**
Develop a picture of the skills and qualities of the ideal candidate and try to reflect this in your responses. Keep in mind the skills and competencies employers generally look for. Take some time also to reflect on your own skills and qualities – what makes you right for the position or course advertised? Remember, completing an application form takes time, so do not apply for positions in which you have little interest. Employers screen out applicants they do not wish to interview – a process known as pre-selection.

**Employers are interested in hard evidence to back up your application**

**Achievements**
Employers are interested in hard evidence to back up your application. Reviewing your achievements over the past 4 years can be a very effective approach to gathering this evidence.

An achievement can be any activity or task satisfactorily completed, such as combining study and family responsibilities, getting an article published, participating in the ERASMUS programme, organising a society/club event, winning at a sport, or doing voluntary work. As preparation, try listing your own achievements and then listing the skills developed through each one. Your project/dissertation may be an important item, especially if you can show its relevance to the job for which you are applying.

**Involvement in extra-curricular activity** can offer useful examples of leadership, teamwork and communication skills as well as practical experience of marketing and event management.
Finding work & making applications

YOUR PROFESSIONAL ONLINE PRESENCE

Professional online presence
Social media is rapidly changing the way students look for work. Businesses are increasingly looking up candidates online at various stages in the recruitment cycle, so it’s a good idea to spend some time working on your online presence.

Why social media matters in your job hunt
Social media offers great opportunities to show where your interests lie and display your career focus. Many employers are too busy to look up every candidate, but a growing number of employers do look up prospective employees online, before meeting someone for interview or before offering someone a job. Even once you have got to the stage where you have secured a new role, your new colleagues might look you up online to get a sense of who the new team member will be.

For all of these reasons, and many more, it’s important to manage your online profiles so that you can put your best foot forward at all stages of the job search and hiring process. From carefully guarding your posts right through to creating dynamic online profiles that paint a professional picture of you, there are many ways in which you can make sure that your online presence works for you.

Manage your digital footprint
You’ve probably heard this many times before, but it’s so important to be mindful of the photographs and text that you share online. At the very least, take a look at any existing social media profiles you might have, and think about what message they send to employers.

Put your name into a search engine and see what results come up – is there anything you wouldn’t want an employer to see?

- Take control of your online presence by spending some time reviewing and, where necessary, improving the privacy of your Facebook profile, so that employers can’t read any posts that might undermine your professional image.
- Do also check the privacy settings on photographs and ensure that nothing incriminating is in the public sphere.
- If you’re on Twitter, read through your tweets and consider deleting any that might create a negative impression.

Whichever online platform you use, be it blogging or Instagram or an online forum, always think before hitting “post”. If you suspect that the item you’re about to share could be a bit too edgy for some employers’ tastes, think twice before clicking.
Take it up a notch – get LinkedIn

Now that you’ve done some work to prevent any dodgy posts from going against you, it would be useful to proactively manage your online profiles in a way that enhances your job search. One platform which is worth investigating is LinkedIn. Although it was once seen as the preserve of mid-career professionals, students and graduates are joining LinkedIn in large numbers. This is because it can help with your job hunt in many ways, including:

- It’s a great way to keep track of your network
- It allows you to showcase your skills and experience to employers
- Search for jobs and save your preferred job choices for future search
- The Groups and news features can help to keep you up to date with the industries in which you’re interested
- It is effectively a database showing the career paths of hundreds of millions of professionals worldwide. This makes it a powerful career research tool.

**LINKEDIN PERFECTING YOUR PROFILE**

Developing an **All-Star Profile** will maximise your chances of an employer finding you when they are searching through LinkedIn. Remember to use relevant keywords related to your industry of interest in your profile:

1. A professional photo is essential. Unprofessional photographs can create a negative impression.
2. Tailor your headline so that it conveys what you can do or wish to do. Employers will see this headline when your profile comes up in a search.
3. Make sure your summary gives a clear, concise message about your skill set and what you would like to do. Aim for 2–3 paragraphs and write in the first person.
4. Include details of key tasks, outcomes and achievements in each of your roles to date. Make sure to include dates, a job title and an organisation name for each role.
5. Identify your skills and ask people who have worked with you to write a recommendation for your work.
6. Give full details of your education to date, including key modules, overall grades and thesis titles, if applicable.
7. Aim for over 50 connections to ensure you have an All-Star profile. Remember to personalise every connection request you make, explaining why you wish to connect with that person.
Once you’ve sent in your CV or application form, you need to be prepared for the next step, whether it’s an interview or an assessment centre.

An invite to interview signals that the organisation is very interested in you and is assessing your ‘fit’. There are a wide variety of interview formats ranging in duration from an hour to a day to a series of assessment processes over a period of time.

Panel interviews
Panel interviews provide an opportunity for each interviewer to observe the applicant answering the same questions and to then assess the candidate collaboratively. An effective panel will consist of three to five individuals and each member on the panel will deal with one or more topics, asking a couple of questions on each. Remember to direct your answers first to the person asking the question but draw in other members of the panel by making eye contact.

Case interviews
Primarily used by management consulting firms, the case interview is a discussion between the interviewer and the interviewee on a real or hypothetical business or non-business scenario. Through this process, the interviewer assesses the interviewee’s analytical, problem solving and people skills in handling real-life situations.

Telephone/video/Skype interviews
An increasing number of employers use telephone interviews, particularly for pre-selection purposes. Telephone interviews allow you to take notes, refer to your CV/application form, references or exam results, and even walk around to reduce nerves. Remember that it is not only what you say but how you say it that creates a favourable impression – try to imagine you are face to face with the interviewer, smile as you speak and don’t worry about occasional silences. Tone of voice is also important here.
**Finding work & making applications**

When it comes to online and video interviewing, apply the same principles as you would for a face-to-face interview – excellent body language, professional dress and prepare your answers. Do a ‘trial’ run with a friend so that you don’t run into any technical issues for the real thing.

Overseas companies, and some areas of the public sector are using video interviews for initial screening. They usually have audio and visual tests to ensure your webcam and microphone are working. You will get about 1 minute to read the question and 2–3 minutes to answer. These interviews are usually short – about five questions in total. To access the Video Interview Practice Tool Shortlist.me, just logon to our website tcd.ie/careers.

**Assessment centres**

Assessment centres are a part of the recruitment process used by many companies. They involve a series of assessment activities designed to allow you to demonstrate that you possess the competencies required for the role. Many of the activities are based on realistic work scenarios.

Assessment centres typically last a full day and are a mixture of individual and group-based activities. You will be assessed on your contribution to these activities.

Remember that more than one candidate will be successful and your performance over a range of tasks is what is most important.

**Psychometric testing**

The term ‘psychometric’ is a general one and covers ability tests as well as questionnaires on personality and personal style. The most commonly used ability tests are those measuring numerical, verbal and diagrammatic reasoning. Most tests are multiple choice and there is always a right or wrong answer to each question. Practice can help familiarise you with tests and make you less nervous before you take them. You can practise online by using ‘Profiling for Success’ Online Personality and Ability Assessments and access practice tests online (www.tcd.ie/careers).
Personality questionnaires are designed to provide the employer with additional insights into your personal style. They provide information about your decision-making, problem-solving, communication and team working style and will help the employer decide whether you would work well in their environment. You cannot prepare for personality questionnaires so your best approach is to give honest answers to the questions.

**Disclosing personal information**
If you have a disability, you are free to disclose or discuss that with the organisation you are applying to before, during or after the recruitment process. It is entirely your decision whether or not you choose to do this and if so, at what stage. As your Careers Consultant, we are here to support you through that decision. To make an appointment, logon to MyCareer.

**Further information**
- Profiling for Success – Online Personality and Ability Assessments – a series of online psychometric tests that are available to Trinity College students and staff. The tests are available completely free of charge [www.tcd.ie/careers/profiling_for_success](http://www.tcd.ie/careers/profiling_for_success)
- [www.tcd.ie/careers](http://www.tcd.ie/careers) See advice and testing on Interviews and Assessment Centres or more information about the types of activities at an assessment centre
- [Shortlist.me](http://Shortlist.me) – Practice Video Interviewing Tool.
- Attend a recorded practice interview one to one with a Careers Consultant.

TOP 10 TIPS FOR INTERVIEWS

Making a good impression is key. You have done all the hard work to get to this stage, now follow a few simple guidelines to ensure you put your best foot forward. If you would like to have a trial run and are interested in doing a practice interview with us, view availability on MyCareer.

1. **Be Early**
   It will mean you are not stressed and therefore help you to make a good impression.

2. **Switch your phone off**

3. **Smile**
   As soon as you enter the building give people a warm smile and full eye contact. It also conveys enthusiasm at interview.

4. **Firm Handshake**
   It shows you are confident and professional in a business environment.

5. **Know their Business**
   Do as much research on the organisation in advance; even if they don’t quiz you on it, it’ll give you confidence. Think about their values and culture and how you might fit in.

6. **Know the Role**
   Show that you understand what they are looking for and highlight things you have done or are interested in that they would appreciate.

7. **Body Language**
   Be confident and open in your posture – no crossed arms or slouched shoulders!

8. **Listen**
   Make sure to listen to the question in order to stay on track with your answer. It’s fine to clarify exactly what they meant if you’re not sure.

9. **Use practiced examples**
   Come prepared with a number of stories that show off your skills (See STAR framework overleaf). Be prepared to tailor those examples when necessary.

10. **Conclude**
    Through asking a question or summarising your enthusiasm, make sure to conclude the interview confidently and leave the interviewers aware of how keen you are for the job!
BECOMING THE STAR CANDIDATE

A useful framework to help you with answering competency questions at interview is the STAR approach.

**Situation**
Paint a picture of the example you are going to use. What was the context? Describe the situation briefly.

**Task**
What was your objective? What was the problem or challenge?

**Result**
What was the outcome and how did you improve the situation? What would you do differently the next time?

**Action**
What actions did you take to achieve your goal? Be explicit about your role and the skills used. This is where you will score the points so be clear and succinct about what you did!

Having a number of these ‘STAR’ examples going into the interview, each one showing off a different competency will really show off your skills. Have one prepared for each competency you think is appropriate to the job you applying for, e.g. teamwork, communication etc.
POSTGRADUATE STUDY AND RESEARCH
Postgraduate study is a popular option for a variety of reasons:

- Continue studying a topic of interest.
- Develop specific skills to enable movement in a new career direction, for example a science or arts graduate wishing to work in business or computing.
- A prerequisite for specific types of work, such as teaching or law.

**Here to help**
The Careers Service is here to help with information on awards to fund postgraduate research, information on courses available and postgraduate study events throughout the year.

**Considerations**

- **Your motivation**: Further study will not resolve career choice issues on its own, but can, help you to develop specific knowledge and skills and to gain insights into personal strengths, weaknesses and interests.

- **Your academic record**: This is particularly important when it comes to seeking funding for research degrees. In the majority of cases, funding goes to those with the best academic record.

- **Location** Studying at another Irish university or abroad can expand your range of skills. If going abroad, you may benefit from different cultural experiences and a chance to improve your language abilities. However, the reputation of the institution, the department, your potential supervisor and of the course should be established by following up academic contacts and recent graduate experience.

- **Mode of Learning** Increasing flexibility in studying part-time and at a distance is available. Choose the option that best suits your needs.
If you would like to stay at Trinity, then an important first step would be to look at the online postgraduate prospectus (www.tcd.ie/Graduate_Studies) talk to staff in the School or department where you’re considering undertaking a Ph.D.

Courses and funding in Ireland and UK
The postgraduate study section at the Careers Service website, www.tcd.ie/careers, is a good place to start. It provides you with links to relevant websites, and a list of awards and courses as well as research positions. You can also visit gradireland.com/further-study for help. Some of the largest funding providers in Ireland and the UK are:

- www.research.ie – The Irish Research Council
- www.nidirect.gov.uk Northern Ireland Government Services
- www.ukri.org - UK Research and Innovation

Don’t forget to look at institutional websites for details of grants and awards specific to the institution you may be applying to.

Making applications
Personal statements are often used as part of the application process, particularly in respect of research degrees and their associated funding. For tips on Personal Statement, see www.tcd.ie/careers.

Some programmes, for example the courses in the US and some Oxbridge courses, have early closing dates.

You may be required to attend for interview. At that stage, course directors or research supervisors will be interested in learning more about your motivation for further study.

Study in Europe
This can be a good option for many reasons, including financial. Some resources to get started:

- Erasmus Mundus Joint Masters Degrees are delivered by a consortium of institutions and funding is available. [ec.europa/education/opportunities/higher-education/joint-master_en.html](http://ec.europa/education/opportunities/higher-education/joint-master_en.html)

Next Steps
- Decide between a postgraduate diploma, taught masters, research masters, doctorate or graduate entry programme – what is your requirement?
- Seek advice from careers and academic staff and talk to existing postgraduate students. Don’t drift into further study.
- Consult online databases and prospectuses to find relevant opportunities (and funding).
- Draw up an action plan, including timeframe of applications, possible costs, funding, referees, etc.

Further information

- Careers Service
  [www.tcd.ie/careers/students/advice/postgraduate_study.php](http://www.tcd.ie/careers/students/advice/postgraduate_study.php)
- Careers education workshops
- GradIreland Fair Oct 2nd, 2019, RDS
- Meet with your Careers Consultant to explore your options, discuss applications, etc.
- Overview of financial assistance at [www.studentfinance.ie](http://www.studentfinance.ie)

For information and advice on all aspects of postgraduate study, see [gradireland.com/further-study](http://gradireland.com/further-study)
PERSONAL STATEMENTS FOR FURTHER STUDY
WHAT TO INCLUDE

Winning personal statements

Some personal statements require you to address specific questions, whereas others provide little or no guidance as to what you should include. Whichever format you are faced with there are a number of points that you that are likely to be included.

- Explain your choice of most recent course, the key elements and how you have performed academically.
- Describe the skills and experience gained from your final year project, dissertation, studies and relevant extra-curricular activity, and how this has prepared you for further research/studies. Identify any unique strengths you wish to highlight and any challenges you overcame.
- Explain your motivation for the programme and identify the skills, knowledge and experience you hope to develop.
- State why you have chosen this institution and give details of how you see the programme relating to your career plans.

Further information

- Discuss your draft form with your Careers Consultant
- www.tcd.ie/careers – section on ‘Making Applications’
- Useful websites: gradireland.com, www.prospects.ac.uk and targetjobs.co.uk
PERSONAL STATEMENT MINDMAP

About the research topic/course/institution
- Describe your academic background
- Describe your research interests and goals
- Why have I chosen this course/research topic?
- Why have I chosen this institution?
- Why am I suitable?
- How do my current/previous studies relate to the course I have chosen?
- My understanding and experience of the subject?
- Describe the activities that demonstrate my interest in the course/topic?

The future
- What is the objective of this research/course?
- How can I apply it down the line?
- Be as specific as possible

Evidence of
- Your understanding of the topic/course
- Your academic insight and passion
- Skills that I need to research the topic/complete the course

Work
- Details of jobs, placements, work experience, part-time work, voluntary work
- Outline their relevance to this topic/course

Achievements
- What are my hobbies/skills/interests?
- How might these relate to my chosen course/research (if they do)?
- What am I most proud of?
- Provide supporting evidence of such achievements
- Describe some difficulty(ies) that you have overcome and what you have learned from them

Special attributes
- How would I be an asset to the university or college? (be specific)
- What positions of responsibility have I held in any context?
- What makes me interesting and unique?
- What contribution will I make to the class dynamic/research field?
- How do I fit in with the selection criteria?

Preparation
- Document criteria/qualities required
- Create a list of evidence to match them
- Start drafting early
- Ask an academic/Career consultant/friend for feedback
- Check length limit in words
- Make sure it is your own work and not copied from any source
Learn to articulate the extra skills you possess

The value of a PhD
In-depth knowledge of a specific subject and a unique contribution to a particular field is only the beginning when it comes to describing the value of a PhD qualification. The Irish Universities Association (www.iua.ie) lists the following in its publication Irish Universities’ PhD Graduates’ Skills:

- Research skills and awareness (e.g. specific research methodologies, critical analysis, project and time management)
- Ethics and social understanding
- Communication skills (e.g. oral and written communication and teaching skills)
- Personal effectiveness and development (e.g. independence, persuasion and reflection)
- Teamworking and leadership (e.g. maintaining effective relationships, awareness of working styles)
- Career management (e.g. skills awareness, opportunity awareness, career planning, networking and presenting yourself effectively)
- Entrepreneurship and innovation (e.g. awareness of entrepreneurship skills, intellectual property issues).

Employers asked about the benefits of recruiting people with academic research experience refer to high-level skills such as analytical thinking, report writing, the ability to work independently, advanced research skills, an intellectual approach, communication and presentation skills, learning skills and task commitment. However, not all employers outside academia are familiar with the skills that are necessary to successfully complete a PhD, so it is up to you to market yourself and your time in research effectively.

Destinations of PhD graduates
While a PhD has traditionally been used as a route into employment in an academic setting, increasing numbers of PhD graduates are using their studies to launch careers in a variety of different areas. Management consultancy, applied research, technology transfer and entrepreneurship are some of the areas open to graduates. Research opportunities arise in research institutes and in private industry and are not limited to engineering or science.

Technology transfer typically exploits new ideas incorporating new technologies and the transfer to practical applications in business and entrepreneurship, where starting a company as a spin-off from your research is a possibility.
Destinations of recent Trinity PhD graduates include: research roles in various sectors (pharmaceutical, social research, policy), government agencies and funding agencies, management consultancy, teaching and many more.

Your career
To help you decide on the career path for you, whether within or outside academia, attend one of our specialist workshops that focus on the career-planning process for postgraduate researchers. You can also sign up for the Careers Service/Student Learning Development ‘Generic Skills Module: ‘Planning & Managing your Research & your Career’ credit bearing skills module or make an appointment with your Careers Consultant to discuss your individual plans.

WHAT DO TRINITY GRADUATES DO?
During your time as a Trinity student, you’ll get the chance to develop skills and attributes that will help you to succeed in your future career.
What do Trinity graduates do?

Follow the career journeys of Trinity graduates

Here at the Careers Service, we’ve asked a selection of Trinity graduates to share their career journeys, how they’ve built on their Trinity education and their advice to students. You can read their stories here or go online to view many more.

In terms of alumni outcomes, Trinity ranked 39th highest in the world for producing highly successful and world-changing graduates which is indicative of how Trinity as a university values the careers of its graduates.

1 QS World University Employability Rankings for Graduate Employability 2019

A Trinity education enables our students to reach their full potential both inside and outside the classroom. We want our students to develop their skills and graduate attributes to succeed in their studies and career. They are therefore prepared for the ever-changing challenges of the 21st century workforce.

Trinity’s Vice-Provost and Chief Academic Officer, Professor Chris Morash

Graduate employment

Trinity graduates are among the most employable and workplace ready in the world according to the Times Higher Education 2018 Global University Employability Rankings. Trinity is the only university in Ireland to feature in the top 150 institutions worldwide for employability in these rankings.

95% of the Class of 2017 are in employment or in further study
Alumni Mentoring

Trinity alumni share their experiences and facilitate career planning and research through the Alumni Mentoring programme – a unique opportunity for you to learn about professional life in a broad range of sectors. Alumni Mentoring is open to students in their sophister years who study in a School which participates in the programme. Alumni Mentoring launches generally take place in Michaelmas term. It is a fantastic opportunity to meet with graduates who are working in diverse and interesting areas. Either through a structured mentoring programme or a more casual networking event, you can learn, ask questions and make connections for the future. The programme lasts one academic year. Keep an eye on your School and the Careers Service Events pages for specific dates.

Use Trinity Alumni to build your Network

As a Trinity student or graduate, you have a valuable network of alumni living globally and working in emerging, niche and established sectors. Use Trinity Alumni Online to look at what others have done and ask for advice.

Use LinkedIn to find out more about particular jobs, organisations and to grow your network. It is particularly fruitful to expand your network in sectors where jobs are less plentiful. Alumni and other contacts can help with advice on getting relevant experience and even offer short term opportunities to get experience. Making contact with as many people as possible in your sector of interest will reap rewards.

“Top tips from a student who attended the Alumni Mentoring programme”

It gave me an insight into a career that I am interested in pursuing from people already in the industry. Their advice on how to get your foot in the door of the industry was extremely helpful.
What do Trinity graduates do?

Lydia Toal, Head of Sales, UK & Northern Europe, Wallace Travel Group
Graduated from Trinity, 2014

While studying for my degree, I worked part time in a tourist office. I liked the buzz of working in tourism, but thought I might try my hand at marketing, so I got a new job as a marketing executive for a Dublin tourist attraction when I graduated. From there, I had a platform to learn more about the wider tourism industry and build a network, which then led to my current position. In my current role, I manage all sales and marketing activities for my markets, which are the UK and Northern Europe. My job involves lots of travel to visit clients in my markets and hosting them here in Ireland – and no two days are the same! My advice would be to treat every step along the way as an opportunity – even a part time job can end up giving you an introduction to a new network or reveal jobs that are new to you. Stepping away from your area of study can give you wider opportunities, and employers often like what a diverse education base can bring to their team.

Advice from industry – Sinead D’Arcy
Jameson Graduate Programme. International Graduate Programme Manager, Irish Distillers Pernod Ricard.

- Start thinking about what you want from your career early in your studies. Don’t leave it to final year. gradireland.com/get-started is a good place to start.
- Build up a portfolio of experience and skills. Getting relevant work experience and internships are a great way to do this but there are other ways to build up these skills too, such as volunteering, organising events to raise money for charity or becoming an active member of a college society or local club.
- Highlight your proficiency in a foreign language and make it an eye-catcher by including it in the headline summary on your CV, application, or online profile.
My first foray into the professional world began between my third and fourth year of college, when I did a three month summer internship in KPMG’s corporate tax department. I applied for internships in all four of the “Big 4”, but admittedly didn’t really know what they did! I just knew my peers were active applying for internships at the time, and with just one more year left in college I was eager to get some professional experience on my CV. In the end, I really enjoyed my internship, and was fortunate to be invited to come back to their graduate program after I finished my degree.

It was not easy – many late nights working to deadlines, on top of studying for my accountancy and tax qualifications. But the supports they gave me were strong, and the experience I gained from the clients I worked with gave me a much deeper understanding of the business world. I have since gone on to join the finance department of a fast growing Irish fintech company. Being in a less structured and fast-changing environment has brought a different set of challenges, but it’s exciting to be a part of the journey.
What do Trinity graduates do?

Tara Gallagher – Policy Analyst & Researcher
Graduated from Trinity, 2015

What’s your career story so far?
I graduated from Sociology and Social Policy in Trinity in 2015. I really loved my course. When I was younger I wanted to study journalism or psychology, I was interested in so many things and was confused about choosing a career. When I read about Social Science, it felt right for me as everything I was interested in centred on human behaviour in a way. I did a master’s degree in Public Policy and after a couple of internships, I completed a European Traineeship at the Economic and Social Committee in Brussels. I’m currently working as a policy analyst and researcher in Dublin. My work blends my love of analysis and writing. At 26, I’m still learning a lot and I see myself studying or working in other related fields in the future.

What do you think helped you make decisions?
A lot of research, talking to different people whose work interested me, online career assessments and reading coaching books or articles regularly. I recommend Arianna Huffington’s Thrive Global and author/speaker Mel Robbins.

Any advice for current students?
Follow your intuition and natural strengths when it comes to careers and jobs in general. Even years after graduating, it’s easy to be confused about careers as you don’t fully know what everything is like until you’re working. Once you’re in the workplace, start doing a mental ‘audit’ of what you enjoy and what you don’t enjoy about your work. Then gradually gravitate towards the things that energise you. Consider your personal values and needs when it comes to careers. Ideally, the work should fit you well as a person.

The labour market has changed rapidly in recent years, so don’t feel disheartened if family or friends don’t understand your career choices. Choose something you’re interested in and feel strongly about and you’ll never go wrong. Don’t put pressure on yourself to have things “figured out” by a certain age because careers are no longer a linear path. Embrace the many varied possibilities and enjoy the journey!
I moved to Ireland in 2016 to pursue the Masters in Development Practice (MDP) at Trinity, a two-year multidisciplinary programme in international sustainable development. As the name suggests, the programme places great emphasis on hands-on practical experience and includes three work-based placements as well as a dissertation. While I really enjoyed the diversity of courses and trainings offered, it was through the placements that I really got to zero in on my main area of interest: the environmental and natural resource implications of sustainable development.

The first two placements were facilitated by the MDP – I worked with Oxfam Ireland on climate change resilience in Sub-Saharan Africa for my first internship and later spent 10 weeks in Uganda doing primary research in wetland management and policy.

For my last placement, which I had to find on my own, I spent six months as an intern at the United Nations Environment Programme headquarters in Nairobi, Kenya. I never thought I’d work for the UN, and it might never have happened if not for the support provided by the MDP: logistical and financial backing, substantive career advice as well as much-needed encouragement when things weren’t going according to plan (it took me several months to even get an interview!) The internship itself was a very positive experience: I honed important skills in project management and got to see how a multilateral organization works from the inside. When offered the chance to stay on after the internship as a consultant, I did not think twice.

Through the MDP placements, I had the opportunity to explore different types of work and work environments and bulk up my CV with experiences highly relevant to my professional aspirations. I was also fortunate to meet some great mentors, both within the MDP programme and in the host organizations. My advice to current students is to make the most of the resources Trinity puts at your disposal: talk to your Careers Consultants, reach out to alumni, ask your lecturers to write recommendations and exchange cover letters with your classmates. Their advice might just land you your dream job.

Timeline:
2017 – Oxfam Ireland placement
2017 – Field research in Uganda
2018 – Intern at UN Environment
2019 – Contractor with UN Environment
PLOYERS
WORKING WITH EMPLOYERS

In partnership with employers

The Trinity Careers Service engages with employers across all employment sectors. We work with organisations of every size from SMEs, spin-outs and start-ups to global multinational businesses. These relationships are vital in helping us bring world-class careers opportunities to students, and our work with employers enables us to:

- Bring amazing careers events and activities to campus
- Develop cutting-edge careers programmes, e.g. Employability Awards
- Embed career development opportunities in the curriculum
- Create workplace internships, placements and exchanges
- Prepare future-ready students for 21st century workplaces

Connecting students with employers

By the end of your studies at Trinity you will have developed a set of skills, experience and knowledge that is recognised by employers the world over, making Trinity graduates highly sought after in the job market. To develop career-readiness, we work with employers to bring quality opportunities to students throughout the study cycle. You can access these opportunities through:

- MyCareer, your one-stop-shop for jobs, internships, and competitions
- The Trinity Careers website, packed with career prep resources
- On and off campus events (Careers Fairs, presentations, information stands & more)
- Emails tailored to your career interests – directly to your inbox!
- Trinity’s alumni network, by attending mentoring events and reading graduate profiles
- Participate in the Trinity Employability Award with partner employers
Graduate programmes can be an excellent option when making the transition from university to a work environment. They are often open to students of any discipline and offer competitive salaries and department rotations. You’ll access a great range of opportunities, from on-the-job training and skills development to networking with industry leaders. Many programmes offer teambuilding activities and volunteering days to create stronger teams and give back to the community. Be prepared to have a very active social life!

Ireland is home to many leading multinational and local companies across a broad range of sectors. Many global technology, engineering, business, pharmaceutical and medical devices companies are based here in Dublin - we also have a vibrant arts and creative scene. The Trinity Careers Service can help you link with those companies who are looking to hire Trinity graduates through our careers fairs and events which we hold throughout the year.

With so many great graduate programmes to choose from, it makes sense to put time and effort into finding an employer whose industry, work and values resonate with your career goals and aspirations. You can find details of graduate programmes by logging on to MyCareer, and through speaking directly with employers at our Careers Fairs and Events.

Trinity students and graduates continue to be highly employable and successful in their chosen careers. During their time in Trinity, they get the opportunity to develop key employability skills that allow them to succeed not just in their careers but in their future lives as individuals and members of society.
Take your career to the next level

Masters courses available for both business & non-business graduates

Recruiting Graduate Software Engineers for 2020

Arista Networks is looking for great Graduate/Intern Engineers interested in product development in C/C++ and Go to join the team in Dublin advancing the Software Defined Networking (SDN) revolution.

What will I be doing?

- Writing Linux user space and kernel code to allow 32-bit drivers to DMA 64-bit virtual memory spaces using both Intel and AMD IOMMU controller.

- Accessing ASIC registers over SPI bus, SMbus, PCIe and I2C, to implement high resolution timers (sub-100ns accuracy) and read ASIC hardware specifications to gather near-real-time information on large numbers of packet flows and to generate network congestion statistics.

- Development of configuration management services using Go and Python to support YANG, OpenConfig, NETCONF and RESTCONF over gRPC, ssh and ssl for standardised switch configuration, combined with tools such as git, gerrit, Jenkins, Slack and Trello.

- Development of routing protocol agents (for BGP, OSPF, ISIS) in C/C++ within a Fedora Linux embedded environment. Coding of fault-tolerant, concurrent agents capable of handling the demands of future data centres where high performance and high availability are basic requirements. Fully automated, developer owned, Python based, continuous test harness with 100s of devices under test at any one moment.

What skills do I need:

How do I apply?

Please forward your CV to eokelly@arista.com

Testimonial from Arista Intern: “My internship at Arista taught me a great deal about being a software engineer. I learned how to solve real, practical and difficult problems efficiently and effectively. I got to work with a great team who were willing to teach, and were also enthusiastic to listen to my ideas. There’s a great culture at Arista which revolves around improvement and making everyone feel welcome and part of the team.”
It’s been my biggest challenge.

And my greatest achievement.

Graduate Area Manager Programme
- €61,000 starting salary (rising to €101,600 after four years)
- Pension • Healthcare • Audi A4/BMW 3 series • Closing date for applications is November 30 2019

The Area Manager role gives graduates real responsibility and opportunities to progress. You’ll need to combine intelligence and fresh ideas with a determined ‘roll your sleeves up’ attitude. But from day one I had a plan for the whole year. I was given world-class training from a global retailer and a dedicated mentor who helped me throughout. By the end of the year I knew I was making a real contribution to the success of one of Ireland’s fastest-growing supermarkets. Amazing when you think about it.
