Opportunity for the first year research placement and second year Leadership in Action placement.

We can offer three full-time placements one at each of Maggie's Leeds, Maggie's Dundee and a Maggie's centre within London (www.maggies.org) for six weeks during Summer 2021.

The role will be to work as an integrated member of the centre multidisciplinary teams contributing to the provision of our holistic programme of cancer support with supervision from the Centre Head and their team. Maggie’s offers all four levels of psychological care (NICE Guidance on Oncology and Palliative Care, 2004), and the student will contribute at level one and where appropriate level two (e.g. helping to facilitate our Where Now? course,). They will also each be asked, using a systematic review protocol, to review and refresh the evidence base for one aspect of our psychosocial cancer support programme (e.g. Nutrition course, Managing Stress Course). The initial year placement can be continued the following year with the focus on the evaluation of one aspect of the Maggie’s programme, or another aspect of the Maggie’s unique cancer care model, and the provision of a summary report.

The placement will suit anyone studying a social sciences, psychology, allied health profession, nursing or medical degree.
