Postgraduate Diploma in
Sustainable Energy 2012-2013

This new one-year part-time postgraduate diploma course is aimed at professionals including:
- engineers
- architects
- building managers
- scientists

This new one-year postgraduate course is designed to provide engineers, architects and other suitably qualified professionals with a good understanding of energy management and efficiency as well as sustainable energy generation. The course will advance knowledge in efficiency techniques, sustainable energy technologies and energy management systems and strategies. It will include theory and practice along with economics, current legal requirements and standards. The course will be of particular interest to those already in employment as part of ongoing professional training as well as leading to the widening of new job opportunities for its graduates.

Topics covered include:
- Energy efficiency
- Energy demand (buildings/transport/industry)
- Sustainable Energy Generation (wind/biomass/solar)
- Energy management
- Energy legislation and environment
- Low carbon (fuel cells/nuclear)

Details:
Lectures are held on Friday evenings and Saturday mornings from late September to April, with examinations in May.

The entry requirement is an honours degree (Level 8 on NQF) in Engineering or Science discipline.
