

2018 Michaelmas Term Seminars

Department of Geology

Date	Name and Affiliation	Title
5 th Oct	Daniel Harlov GFZ Potsdam	<i>Apatite: A fingerprint for metasomatic processes</i>
12 th Oct	Andrew Wheeler University College Cork	<i>Carbonates in Canyons: the geology of cold-water coral reefs</i>
19 th Oct	Weimu Xu University College Dublin	<i>Major super-greenhouse events and their expressions and feedbacks in marine and continental realms</i>
2 nd Nov	Gert Jan Weltje KU Leuven	<i>Stratigraphically constrained provenance reconstruction of multi-source basin fills: lessons from the Adriatic Sea</i>
9 th Nov	Tom Ray	<i>What Studies of Star and Planet Formation Now Can Tell Us About the Early Solar System</i>
16 th Nov	Alex Dickson Royal Holloway, Univ. of London	<i>Metal stable isotope proxies to study global paleoclimatic and paleoenvironmental change events across the Phanerozoic</i>
23 rd Nov	Martin Wille	<i>Marine paleo-redox reconstruction based on redox-sensitive metals</i>
30 th Nov	Steven Hollis University College Dublin	<i>Applications of clumped C-O and Pb isotopes to the Irish orefield: constraining regional to local-scale fluid flow</i>

All seminars are held in the Houghton Lecture Theatre on the first floor of the Museum Building, on Fridays between 1-2 pm
