Current Legal Challenges Facing Primary School Management

Those involved in the management of primary schools today are faced with tough challenges, requiring a good understanding of the present law. They must seek to reduce the potential exposure of their school to legal liability, by having sound processes in place, anticipating areas of particular concern and responding appropriately to problematic situations.

Amongst the issues to be considered are the following:

What potential liability does a school have where a pupil is bullied by another pupil outside school hours?

What level of protection must a school provide employees and pupils from violence perpetrated by outsiders who gain access to the school?

What is the responsibility of school management for the use of social media by their pupils?

What is the present position relating to section 29 appeals?

What liability attaches to a school for injuries to pupils on school premises before or after school hours?

Where a pupil's parents are not married to each other or have divorced or separated, how should the school deal with issues of discipline, safety or welfare affecting the pupil?

What pitfalls should be avoided in regard to a school's admissions policy in the light of the new legislative proposals?

What are the legal requirements in regard to school dress codes that may impact on religious sensibilities?

What special considerations of health and safety may arise in regard to pupils with special needs?

What do the courts require of school management where a teacher shows signs of stress in the job?
