

Research Assistant: Experimental Neuropharmacology

Transpharmation Ireland Ltd is an Irish start-up and subsidiary of Transpharmation Ltd (UK) which is a Contract Research Organisation (CRO) spun out of GlaxoSmithKline Pharmaceuticals (GSK) in 2010.

Transpharmation Ireland Ltd, registered in Ireland in June 2014, holds the unique position of being the only neuroscience based CRO in Ireland underpinned by a blend of expertise in drug discovery acquired in the pharmaceutical industry and the scientific know-how of academic research. Transpharmation Ireland has campus company status in Trinity College Dublin - Institute of Neuroscience (TCIN). We perform innovative research in order to offer pharmaceutical industries cutting-edge translational neuroscience capabilities to rapidly advance drug discovery particularly in the field of psychiatric disorders. Our aim is to be considered worldwide as **“The Innovation Hub for the Neurobiology of Cognition, Mood and Aging”**.

An opportunity currently exists for a research assistant position at Transpharmation Ireland Ltd. The position is for an initial 6 month - 1 year period with the potential for a longer term career.

The ideal candidate should be a graduate in neuroscience or related discipline; experience in the drug discovery industry is recommended. Potential candidates will ideally have experience with rodent handling, pharmacological administration and behavioral assays related to psychiatric diseases and neurodegenerative disorders.

Candidates must be highly motivated and flexible with the ability to multi-task. Good interpersonal skills are also essential as you will be working closely with other members of the Transpharmation teams and with scientists from academic institutions in support of our research projects.

Applications deadline: *1st of July*
