

Module Code	MEP56BM1
Module Name	Medical Device Design Innovation Project
ECTS Weighting	10 ECTS
Semester taught	Semester 1 & 2
Module Coordinator/s	Assoc. Prof. Bruce Murphy
Module Learning Outcomes with reference to the Graduate Attributes and how they are developed in discipline	<p>On successful completion of this module, students should be able to:</p> <p>LO1. Understand the medical device regulatory systems in the US and European Union</p> <p>LO2. Apply engineering principles to determine how medical devices either have successfully treated patients or have failed.</p> <p>LO3. Understand the importance of the patenting system within the arena of medical device design</p> <p>LO4. Understand the importance of legal and ethical aspects of medical device design and development</p> <p>LO5. Understand the needs driven approach to developing new medical devices</p> <p>Graduate Attributes: levels of attainment</p> <p>To act responsibly - Enhanced</p> <p>To think independently - Enhanced</p> <p>To develop continuously - Enhanced</p> <p>To communicate effectively - Enhanced</p>
Module Content	<p>The module is designed to educate the course participants in the field of early stage, “needs lead,” medical device design. The course firstly takes the format: whereby the entire class and lecturer work as a team to discover the true nature of the clinical need and background information required to develop a new medical device in a particular area. The class then splits into a number of competing groups that can utilise this information to develop a solution to solve the clinical need. The groups must then advance the engineering solution, and in parallel advance the business case for their solution. The solution/business plan must satisfy, regulations, intellectual property constraints, manufacturing requirements, cost effective analysis and user needs. The final output is a business plan and engineering plan that potentially will enable the solution to be developed in the future.</p>

Teaching and Learning Methods	This module uses Blackboard, podium lectures, self-directed assignments, to help students achieve the required learning outcomes.				
Assessment Details Please include the following: <ul style="list-style-type: none"> • Assessment Component • Assessment description • Learning Outcome(s) addressed • % of total • Assessment due date 	Assessment Component	Assessment Description	LO Addressed	% of total	Week due
	Assignment	Week 10 final reports due. Presentations over the two semesters.	1-4	100	Week 10 S2
Reassessment Requirements	There is no reassessment for the MSc in Bioengineering				
Contact Hours and Indicative Student Workload Error! Bookmark not defined.	Contact hours: (44) 44 Lectures, 2 hour interactive workshop				
	Independent Study (80) (preparation for course and review of materials):				
	Independent Study (25) (preparation for assessment, incl. completion of assessment):				
Recommended Reading List	<p>Intellectual Property, Medicine and Health (Intellectual Property, Theory, Culture) 2nd Edition by Johanna Gibson (Author)</p> <p>**Biodesign: The Process of Innovating Medical Technologies 2nd Edition by Paul G. Yock (Author), Stefanos Zenios (Author), Josh Makower (Author), Todd J. Brinton (Author), Uday N. Kumar (Author), F. T. Jay Watkins (Author), Lyn Denend (Author),</p> <p>The Founder's Dilemmas: Anticipating and Avoiding the Pitfalls That Can Sink a Startup (The Kauffman Foundation Series on Innovation and Entrepreneurship) Paperback – April 1, 2013 by Noam Wasserman (Author)</p>				

	<p>The Innovator's Dilemma: The Revolutionary Book That Will Change the Way You Do Business Paperback – October 4, 2011 by Clayton M. Christensen</p> <p>Zero to One: Notes on Startups, or How to Build the Future Hardcover – September 16, 2014 by Peter Thiel</p> <p>Venture Deals: Be Smarter Than Your Lawyer and Venture Capitalist Hardcover – December 26, 2012 by Brad Feld (Author), Jason Mendelson</p> <p>The Survival Guide to Eu Medical Device Regulations Paperback – June 20, 2017 by Petri Pommelin</p> <p>** Highly recommended</p>
Module Pre-requisite	4BIO5 Biomechanics and 4BIO6 Biomaterials
Module Co-requisite
