We Are Unique

Live Action Learning in Real Company Projects

The single most differentiating feature of the Trinity MBA is our focus on live action learning. You will undertake 3 group projects focusing on complex strategic issues in real organisations.

Unlike other MBAs, your group will work directly with senior executives in social entrepreneurship organisations, high potential start-ups, SMEs and blue chip multinational companies.

Leadership and Professional Development

Running the entire duration of the programme, this module will develop your personal and organisational skills, and self-knowledge. You will be assigned a personal coach to guide you through a range of psychometric profiling tests focusing on personal insight, growth and development.

Profiling your leadership DNA in this way highlights your natural strengths and the potential challenges you may face. You will also work with fully qualified high performance coaches to develop your collaboration skills in teams.
