About The Course

In recognition of a shared interest in Information Technology and a growing awareness of its relevance for music, Electronic and Electrical Engineering and Music initiated a Master programme in Music and Media Technologies in Trinity in 1996. A particular feature of this programme is a balanced approach to musical and technological topics. Musically, a strong emphasis is placed on the development of adaptable compositional skills, while technological topics are addressed from both a hands-on workstation/studio exposure and a fundamental mathematical and scientific basis, which focus on musically relevant issues.

The overall objective of the MMT programme is to provide a thorough grasp of the principles and applications of computer, audio and video technologies in combination with significant exposure to media related topics such as music, visual music, and interactive installations. Artistic creativity is stimulated and developed over the year of the programme through a combination of exam and assignment-based work and culminating in a final thesis which features a significant and original contribution of a technological and/or artistic nature.

Course Structure

The MMT programme is a full-time, one-year course. Postgraduate Diploma, worth 60 ECTS, is divided into two 30-ECTS semesters. To be awarded an M.Phil. in Music and Media Technologies, students must complete a third semester worth 30 ECTS, which requires the completion of a research project and written thesis, for a total of 90 ECTS.

Our comprehensive curriculum includes:

— Sound design and synthesis
— Interactive audiovisual systems
— Music production and composition
— Digital signal processing
— Multimedia technology and innovation
— Music and media research
