Teaching & Learning	Academic Integrity and Referencing Guidance	<p><b>Standard Text on Academic Integrity:</b> to be copied from the Calendar, with a link to (i) the <a href="#">Academic Integrity webpage</a>, (ii) the <a href="#">Library Guidelines on Academic Integrity</a> and (iii) <a href="#">coversheet declaration text</a> for submitted assignments.</p> <p><b>Standard Text on GenAI:</b> <i>‘Aligned with the <a href="#">College Statement on Artificial Intelligence and Generative AI in Teaching, Learning, Assessment &amp; Research (2024)</a>, the use of GenAI is permitted unless otherwise stated. Where the output of GenAI is used in a document or work output, this usage should be acknowledged and appropriately cited, as per <a href="#">Library guidelines on acknowledging and reference GenAI</a>. From an academic integrity perspective, if a student generates content from a GenAI tool and submits it as their own work, it is considered plagiarism, which is defined as academic misconduct in accordance with <a href="#">College Academic Integrity Policy</a>. If individual modules have further restrictions or permit greater allowances in the use of GenAI, those restrictions or allowances must be stated in the module descriptions in the Blackboard VLE. In such circumstances, it is the module permissions regarding the use of GenAI which are deemed to be definitive for use in that module.’</i></p>	<p><a href="#">Calendar, Part II, General Regulations and Information, ‘Academic Integrity’</a></p> <p><a href="#">Calendar, Part III, Section I: General Regulations and Information, ‘Academic Integrity’</a></p>
Teaching & Learning	Explanation of ECTS Weighting	<p><b>Standard Text:</b> <i>‘The European Credit Transfer and Accumulation System (ECTS) is an academic credit system based on the estimated student workload required to achieve the objectives of a module or programme of study. It is designed to enable academic recognition for periods of study, to facilitate student mobility and credit accumulation and transfer. The ECTS is the recommended credit system for higher education in Ireland and across the European Higher Education Area.’</i></p>	<p><a href="#">ECTS in undergraduate programmes: Guidelines</a></p>

Section	Item	Description/Further Information	Reference/Source
Teaching & Learning	Explanation of ECTS Weighting cont.	<p><i>'The ECTS weighting for a module is a measure of the student input or workload required for that module, based on factors such as the number of contact hours, the number and length of written or verbally presented assessment exercises, class preparation and private study time, laboratory classes, examinations, clinical attendance, professional training placements, and so on as appropriate. There is no intrinsic relationship between the credit volume of a module and its level of difficulty.</i></p> <p><i>The European norm for full-time study over one academic year is 60 credits. 1 credit represents 20-25 hours estimated student input, so a 10-credit module will be designed to require 200-250 hours of student input including class contact time, assessments and examinations. ECTS credits are awarded to a student only upon successful completion of the programme year. Progression from one year to the next is determined by the programme regulations. Students who fail a year of their programme will not obtain credit for that year even if they have passed certain component. Exceptions to this rule are one-year and part-year visiting students, who are awarded credit for individual modules successfully completed'.</i></p>
