1. Progression Regulations

Progression regulations will be standardised as much as possible across undergraduate programmes. Some variation may be required to accommodate requirements from external professional and accrediting bodies.

Programme	Derogation granted
Dental Science	Unable to fit with standard progression regulations due to external professional accreditation barriers.
Medicine	Unable to fit with standard progression regulations due to external professional accreditation barriers.

2. Annual Progression

- i. Progression should be on an annual basis.
- ii. Students should be allowed to carry failed modules from semester to semester, but not from year to year.
- iii. Students should receive provisional module results after Semester 1 for all modules completed and assessed during Michaelmas term. Courts of Examiners should convene after Semester 2 assessment and consider and confirm the results from both semesters.

No derogations required.

3. Progression Threshold

- i. The mark representing a pass should be standardised as far as possible across all programmes. All programmes should provide clear grade descriptors setting out what constitutes a pass.
- ii. The progression threshold in all standard four-year degree programmes will not be higher than the pass mark.

Programme	Derogation granted
Chemistry	i Standard Pass Mark The standard pass mark for Chemistry is 40%. Fresh Years For 10 ECTS credit modules in Fresh years, a minimum mark requirement will be defined as 35% in the examination component (currently making up 70% or 75% of the total, depending on the module) and 40% in the practical component (currently 25% of the total), in order for a Pass or Qualified Pass mark in the module to be granted, beginning in academic year 2025/26 and thereafter. Other components making up fewer marks are not included. Should this minimum mark not be achieved in a module where an overall mark of 40% or more has been attained, the module will be returned Qualified Fail. For the avoidance of doubt, a module with Fail or Qualified Fail in these circumstances will prevent a year being passed by compensation. Students in other Science streams (JF: Physical Sciences UBSC-PSCI-2F and Geosciences UBSC-GGEO-2F) (SF: Physical Sciences UBSC-PSCI-1F and Geosciences UBSC-GGEO-1F) may also select the modules as open modules. The derogation applies irrespective of the degree stream of the student taking the module, registration or visiting student status, or year of first admission (see Appendix 1 for module details). Sophister Years For JS and SS modules that are 100% practical based, and JS and SS modules with a practical component, a minimum mark requirement of 40% in the practical component is required, in order for a Pass or Qualified Pass mark in the module to be granted. Should this minimum mark not be achieved in a module where an overall mark of 40% or more has been attained, the module will be returned Qualified Fail. For the avoidance of doubt, a module with Fail or Qualified Fail in these circumstances will prevent a year being passed by compensation. In the event where a module is returned as a Qualified Fail due to a pass mark in the examination component and a fail mark in the practical component, then only the practical component will be reassessed (see Appendix 1 for module details).

3. Progression Threshold

- i. The mark representing a pass should be standardised as far as possible across all programmes. All programmes should provide clear grade descriptors setting out what constitutes a pass.
- ii. The progression threshold in all standard four-year degree programmes will not be higher than the pass mark.

Dental Science	i Standard Pass Mark The standard pass mark for Dental Science is 50%. However, an exception is necessary for (i) Objective Structured Clinical Exams (OSCEs) which are standard set as per international best practice and (ii) clinical credits which require 60% for progression—these credits are awarded based on a combination of safety, skill, professionalism and attendance. The pass mark has been calibrated over the years to reflect the Dental Council's requirements and also the EU directive on number of hours teaching.
Medicine	i Standard Pass Mark The standard pass mark for Medicine is 50%. However, the standard setting methods used for objective structured clinical examinations (OSCEs) results in a pass mark of 60%+, in accordance with the validity and reliability requirements for accreditation.
Physics	i Standard Pass Mark The standard pass mark for Physics is 40%. In four JF and four SF modules, there is a minimum mark requirement of 30% separately in the Examination component and the Laboratory component, in order for a Pass or Qualified Pass mark in the module to be granted. Other components making up fewer marks are not included. Should such a minimum mark requirement not be achieved in a module yet where an overall mark of 40% or more has been attained, the module will be returned Qualified Fail. For the avoidance of doubt, a module with Fail or Qualified Fail in these circumstances will prevent a year being passed by compensation. This applies irrespective of the degree stream of the student taking the module, such as those on Physical Sciences, Chemical Sciences, and Theoretical Physics programmes, registration or visiting student status, or year of first admission. (See Appendix 1 for module details)
Social Studies	A minimum attendance of 80% is required to pass a module (see School entry in the Calendar Part 2 for further details, including potential consequences of failure to meet this requirement)

4. Minimum Credits to Pass a Year

- i. Students should have a balanced credit load across the two semesters, i.e., 30 credits in semester 1 and 30 credits in semester 2.
- ii. The number of credits to pass a year should be 60 [this is predicated on all undergraduate programmes comprising 60 ECTS per year].
- iii. Compensation: All modules and components within modules are “compensatable”.
- iv. 10 ECTS may be accumulated at ‘Qualified Pass’ (i.e. marks between 35-39% where the pass mark is 40% or 45-49% where the pass mark is 50% for some professionally accredited courses).

Programme	Derogation granted
Chemistry	iii Compensation The accrediting body (RSC) mandates that practical components of modules, practical modules, and capstone projects need to be passed at the pass mark and students should not be allowed to progress with a compensated or qualified fail in any practical component or module in any year (see Appendix 2 for module details).
Clinical Speech and Language Studies (CSLS)	iii Compensation Compensation between clinical and non-clinical components is not possible due to accreditation requirements. Academic and clinical modules are designed to ensure students meet the competencies set down by the regulatory body, CORU. Compensation is not permitted in any year between modules (see Appendix 2 for list of modules).
Columbia Dual Degree (English Studies; History; Middle Eastern and European Languages and Cultures (MEELC); European Studies; History of Art and Architecture; Film; Classics, Ancient History and Archaeology (CLAHA); Biological and Biomedical Science (Neuroscience); Geography and Geoscience; Philosophy; Religion; and Mathematics)	ii Number of Credits to Pass a Year <u>Students who entered the Dual Degree prior to and including 2025/26:</u> Students take an additional 30 ECTS credits for Trinity over their final two years whilst studying at Columbia University. <u>Students who enter the Dual Degree from 2026/27:</u> Students will take a minimum of 64 credits (32 credits per year) as per the requirements of their Columbia degree while at Columbia University. iii Compensation <u>Students who entered the Dual Degree prior to and including 2025/26:</u> Compensation will not be possible across the 30 extra Trinity credits taken in the final two years. No derogation necessary for students entering from 2026/27.
Dental Science	i Balanced Credit Load Some integrated modules have a higher credit weighting and are delivered in teaching blocks rather than in semesters thereby resulting in a credit load that is not balanced in each year. <i>(contd)</i>

4. Minimum Credits to Pass a Year

- i. Students should have a balanced credit load across the two semesters, i.e., 30 credits in semester 1 and 30 credits in semester 2.
- ii. The number of credits to pass a year should be 60 [this is predicated on all undergraduate programmes comprising 60 ECTS per year].
- iii. Compensation: All modules and components within modules are “compensatable”.
- iv. 10 ECTS may be accumulated at ‘Qualified Pass’ (i.e. marks between 35-39% where the pass mark is 40% or 45-49% where the pass mark is 50% for some professionally accredited courses).

	iii Compensation Compensation is not applied between written and clinical assessments. From a regulatory standpoint there is a detailed list of competencies, many of which are clinical skills (e.g. diagnosis, examination, record-taking etc.). Dental Science must be able to certify that students are competent in these clinical areas; therefore compensation between clinical and written assessment is not permitted (see Appendix 2 for details).
Law	iii Compensation Accreditation mandates a passing grade in core law subjects in order to obtain a qualifying law degree. Passing these core modules by compensation is not sufficient to obtain a qualifying law degree. This will apply to all students on the Law programme (UBLW-LAWS-2F) and students on all Joint Honour Law pathways, including Law and French/German (see Appendix 2 for details).
Medicine	i Balanced Credit Load A balanced credit-load is not possible in clinical years as the programme/modules are typically spread over 15+25 weeks (not 11+11 weeks). iii Compensation Compensation is not permitted across core modules in all five years of the Medicine programme. However, some compensation within modules is permitted; e.g. in modules with clinical components, theoretical components may be compensated with clinical assessment but not vice versa (see Appendix 2 for details).
Music Education (B.Mus.Ed.)	i Balanced Credit Load JF No derogation needed. SF Semester 1 has 32.5 credits; Semester 2 has 27.5 credits. (SP is in semester 2) JS: Semester 1 has 32.5 credits; Semester 2 has 27.5 credits (SP is in Semester 1) SS: Semester 1 has 35 credits because the Capstone module is seeded throughout semester 1 but the lion’s share of the work occurs in semester 2. Similarly, Advanced Aural Skills and Advanced Composition require an incremental engagement from semester one but again, the lion’s share of the work is done in semester 2. Semester 2 has 25 credits. iii Compensation In line with professional degree courses there are specific professional placement components for post primary classroom teaching that are non-compensatable (list of modules can be viewed in Appendix 2). Should students fail School Placement, they must repeat the component/module during the following year.

4. Minimum Credits to Pass a Year

- i. Students should have a balanced credit load across the two semesters, i.e., 30 credits in semester 1 and 30 credits in semester 2.
- ii. The number of credits to pass a year should be 60 [this is predicated on all undergraduate programmes comprising 60 ECTS per year].
- iii. Compensation: All modules and components within modules are “compensatable”.
- iv. 10 ECTS may be accumulated at ‘Qualified Pass’ (i.e. marks between 35-39% where the pass mark is 40% or 45-49% where the pass mark is 50% for some professionally accredited courses).

Nursing and Midwifery	ii Number of Credits to Pass a Year Professional accreditation requires students to complete the Children’s and General Nursing programme over 4.5 years. Students are required to complete 280 ECTS taking 70 credits in each of the first three years, and the final 70 credits over the final 1.5 years. Year 1 = 70 ECTS, Year 2 = 70 ECTS, Year 3 = 70 ECTS and Years 4+5 = 70 ECTS. iii Compensation The assessment strategy of the Nursing and Midwifery Board of Ireland (NMBI) does not allow compensation between theoretical and clinical practice placements. In line with the development of the new Nursing and Midwifery curricula, which was implemented in 2018/19, some compensation within modules is permitted (see Appendix 2).
Occupational Therapy	i Balanced Credit Load Occupational Therapy is unable to implement a balanced ECTS credit load across semesters in the JS and SS years because of the Practice Education (Clinical Placement) requirements. Placements are of 12 weeks’ duration in the JS year and 11 weeks in the SS year and account for a full semester. iii Compensation Compensation between clinical and non-clinical components is not possible due to accreditation requirements. Academic and clinical modules are designed to ensure students meet the competencies set down by the regulatory body, CORU. Compensation is permitted in the JF year in some modules (no compensation in three modules) and in the SF year in some modules (no compensation in seven modules); some compensation is possible within modules (see Appendix 2 for list of modules).
Pharmacy	iii Compensation For the five-year Pharmacy (Integrated) Programme, students are not allowed to compensate in any of the Pharmacy Practice and Pharmaceutics modules. Failure in these modules will require the student(s) to be reassessed at the supplemental session (see Appendix 2 for list of modules).
Physiotherapy	iii Compensation Compensation between clinical and non-clinical components is not possible due to accreditation requirements. Academic and clinical modules are designed to ensure students meet the competencies set down by the regulatory body, CORU. Compensation is not permitted in any year across modules; some compensation is possible within modules (see Appendix 2 for list of modules).

4. Minimum Credits to Pass a Year

- i. Students should have a balanced credit load across the two semesters, i.e., 30 credits in semester 1 and 30 credits in semester 2.
- ii. The number of credits to pass a year should be 60 [this is predicated on all undergraduate programmes comprising 60 ECTS per year].
- iii. Compensation: All modules and components within modules are “compensatable”.
- iv. 10 ECTS may be accumulated at ‘Qualified Pass’ (i.e. marks between 35-39% where the pass mark is 40% or 45-49% where the pass mark is 50% for some professionally accredited courses).

Radiation Therapy	i Balanced Credit Load Radiation Therapy is unable to implement a balanced ECTS credit load across semesters in all years because of the Clinical Placement requirements. Placements are conducted during and beyond the 11 teaching weeks in each semester. iii Compensation Compensation between clinical and non-clinical components is not possible due to accreditation requirements. Academic and clinical modules are designed to ensure students meet the competencies set down by the regulatory body, CORU. Compensation is permitted in two modules only in each of the JF and SF years, but is not possible in either of the Sophister years. There is some compensation within modules in all four years (see Appendix 2 for list of modules).
Social Studies	i Balance Credit Load Students are required to take increased ECTS in each year of the course for professional accreditation purposes. This can result in an unbalanced credit load on some occasions. The credit balance is as follows: • Junior Fresh = 70 ECTS, Semester 1 = 40 ECTS, Semester 2 = 30 ECTS. • Senior Fresh = 80 ECTS, Semester 1 = 30 ECTS, Semester 2 = 35 ECTS, Trinity Term = 15 ECTS Placement • Junior Soph = 75 ECTS (Semester 1 = 35 ECTS on Placement, Semester 2 = 40 ECTS Taught Modules) • Senior Soph = 75 ECTS (Semester 1 = 40 ECTS on Placement, Semester 2 = 35 ECTS Taught Modules) ii Number of Credits Professional accreditation requires students to complete 300 ECTS across the 4-year period. CORU requires that the increased ECTS credits are maintained into the future to retain accreditation and to ensure that the qualification continues to be recognised in Ireland and abroad. JF = 70 ECTS, SF = 80 ECTS, JS = 75 ECTS and SS = 75 ECTS. iii Compensation Accreditation mandates the retention of a number of non-compensatable modules (See Appendix 2 for the updated list of modules).

5. Degree Award Calculations

The calculation of the degree award will be based on the final two years (JS+SS) on a 30%/70% basis.

Programme	Derogation granted
Columbia Dual Degree (English Studies; History; Middle Eastern and European Languages and Cultures (MEELC); European Studies; History of Art and Architecture; Film; Classics, Ancient History and Archaeology (CLAHA); Biological and Biomedical Science (Neuroscience); Geography and Geoscience; Philosophy; Religion; and Mathematics)	<u>Students who entered the Dual Degree prior to and including 2025/26:</u> Degrees will not be able to meet the 30/70 calculation method. For the purpose of calculating the Trinity degree classification, the cumulative GPA from the period of registration at Columbia will be converted on the basis of an agreed conversion table and combined with the aggregate mark from the additional modules required by Trinity (30 ECTS credit) on an equal basis. <u>Students who entered the Dual Degree from 2026/27:</u> Degrees will not be able to meet the 30/70 calculation method. For the purpose of calculating the Trinity degree classification, the overall end of year mark from the Senior Fresh year will be combined with the cumulative GPA from the period of registration at Columbia will be converted on the basis of an agreed conversion table on a 20/80 basis.
Medicine	Medicine's current 50/50 calculation is based on the named parts of the degree completed in year 4 (Obstetrics/Gynaecology and Paediatrics) and year 5 (Medicine and Surgery). The modules in Year 4 & 5 are delivered and assessed so that each student receives the required teaching and clinical placement hours in the designated clinical speciality. The modules are weighted equally in the overall degree calculation. Medicine has agreement in principle to work towards including Public Health and Primary Care in the final degree award calculation in accordance with Medical Council recommendations. Once approved, the revised calculation will be implemented on a 60/40 basis.
Middle Eastern and European Languages and Cultures (MEELC)	<u>MEELC students entering Junior Sophister in 2021/22 – 2026/27</u> will have their degree calculated only on their SS grades. <u>Students entering from Junior Sophister from 2027/2028,</u> will return to the standard degree calculation of JS 30% / SS 70%.

6. Number of Years to Complete a Degree

The maximum number of years to complete an undergraduate degree programme should be:

- 6 years for a standard four-year programme
- 7 years for a five-year programme unless otherwise specified by accrediting bodies.

Programme	Derogation granted
Medicine	No derogation necessary. Attention is drawn to the fact that in Medicine a student who does not complete the course in 7 years, including years off the books, may not be able to register in some jurisdictions.
Occupational Therapy	Students may be required to leave the course prior to 6 years in instances where a student fails a placement more than once or fails two placement modules.
Pharmacy	Students are required to successfully complete the entire Pharmacy (integrated) programme (B.Sc. (Pharm.) and Master in Pharmacy degree courses) within 8 years of starting the B.Sc. (Pharm.) course in order to be eligible for the award of Master in Pharmacy. In exceptional circumstances, this period may be extended by 1 year.

7. Repetition of a Year ¹

i. Students should be allowed to repeat all years.

ii. Students should not repeat any academic year more than once within a degree programme and may not repeat more than two academic years within a degree programme [See Regulation 6].

iii. Repetition of a year is in full, i.e., all modules and all assessment components. There will be an option to repeat a year on an 'off-books' basis.²

Programme	Derogation granted
Dental Science	iii Repetition of a year is in full Students cannot repeat a year off-books with assessments (OBA) due to the clinical requirements in any given year. ³
Nursing & Midwifery	iii. Repetition of a year is in full Where a student is required to repeat a module listed in Appendix 4, they are permitted to repeat only the failed assessment component, i.e. either the clinical or theoretical assessment component as appropriate. Where a student has failed both components they would be expected to repeat the module in full. ³ The Senior Sophister year can only be repeated OBA due to the paid internship.

¹ The student's academic record on their transcript will show clearly the time lost through repetition of a year.

² Of the nine recommendations approved by Council, one (recommendation 7) was subsequently revised in May 2018 further to the Board decision of 28 March 2018 (BD/17-18/178), which agreed to return the University's position in relation to supplemental exam fees and modular billing to the status quo. The implementation of modular billing was deferred for at least one academic year, in order to facilitate a full and detailed analysis of all potential streams of revenue to fund it.

³ Should the ability to repeat on a module-by-module basis be reinstated for 2027/28, derogations will be granted to Dental Science and Nursing and Midwifery Programmes. footnote

7. Repetition of a Year ¹

- i. Students should be allowed to repeat all years.
- ii. Students should not repeat any academic year more than once within a degree programme and may not repeat more than two academic years within a degree programme [See Regulation 6].
- iii. Repetition of a year is in full, i.e., all modules and all assessment components. There will be an option to repeat a year on an 'off-books' basis.²

Occupational Therapy	If a student fails one placement, they may be permitted to repeat the placement; however, only one attempt at a repeat placement is permitted. If that repeat placement is failed, or if any further placements are failed over the four years of the course, the student will be excluded from the course. Occupational Therapy students complete practice education placements (clinical placements) across the 4 UG years. These placements have ECTS weighting but they are treated very differently from academic modules as these are essential professional practice components of the course.
----------------------	---

8. Reassessment ⁴

- i. Supplementals should be available in all years.
- ii. The right to supplementals where a student has failed at the annual session should be automatic.⁵
- iii. The same progression regulations, including compensation, should be applied at annual and supplemental sessions.
- iv. Re-scheduled exams within the session should be discontinued.
- v. Students (in all years) should only be required to re-sit examinations or re-submit coursework for failed modules or components thereof.
- vi. Different reassessment modalities should be allowed where appropriate.
- vii. Where supplemental assessments are taken, marks are awarded and agreed as usual. Capping will not be applied.

Programme	Derogation granted
Chemistry	vii. Re-assessment Capping A cap (maximum mark) of 40% will apply to i) All reassessed components for core Junior Fresh and Senior Fresh Chemistry modules delivered as part of the Chemical Sciences course (and available to students in the Physical Sciences UBSC-PSCI-1F and Geosciences UBSC-GGEO-1F courses (as Open modules), and furthermore ii) All modules in the Sophister years (except Trinity Electives) within the programmes of Chemistry, Medicinal Chemistry, Chemistry with Molecular Modelling, and Chemistry with Biosciences irrespective of the owning School. (See Appendix 6 for module details). <i>(contd)</i>

⁴ Students who are given permission to defer from the annual to the supplemental session (including on medical grounds) are recorded at the annual session as 'Defer'. As with Recommendation 7 (i), the student's academic record on their transcript will show clearly the stages at which the student has supplemented and/or repeated years.

⁵ Students who have passed at the annual session are not permitted to present at the supplemental session in order to improve their performance.

8. Reassessment ⁴

- i. Supplementals should be available in all years.
- ii. The right to supplementals where a student has failed at the annual session should be automatic.⁵
- iii. The same progression regulations, including compensation, should be applied at annual and supplemental sessions.
- iv. Re-scheduled exams within the session should be discontinued.
- v. Students (in all years) should only be required to re-sit examinations or re-submit coursework for failed modules or components thereof.
- vi. Different reassessment modalities should be allowed where appropriate.
- vii. Where supplemental assessments are taken, marks are awarded and agreed as usual. Capping will not be applied.

	In each of the modules in Appendix 6, a cap (maximum mark) of 40% will be applied to all reassessed components. The capped component mark will be used to calculate the component-weighted module average mark, and hence the module-weighted year average mark, and hence the year-averaged mark used to establish the degree award classification. Re-assessment capping does not apply to deferred 1st attempts during the re-assessment session. Further information is available in the relevant programme handbooks.
Medicine	v Repetition of Failed Components Only In specified modules, students are required to pass both written and clinical assessment components in the same assessment sitting. Students who fail, or are absent from, the clinical (or written) component of the examination in any subject will be required to repeat the written and clinical components of that subject, even if they have previously passed the written (or clinical) component (See Appendix 5).
Physics	vii. Re-assessment Capping A cap (maximum mark) of 60% will apply to i) All reassessed components for core Junior Fresh and Senior Fresh Physics modules delivered as part of the Physical Sciences and Theoretical Physics courses (and available to students in the Chemical Sciences course as Open modules) and ii) All modules in the Sophister years (except Trinity Electives) within the four accredited programmes of Physics, Physics & Astrophysics, Nanoscience, and Theoretical Physics (See Appendix 6 for module details and programme and route codes applicable). Accreditation of these is by the Institute of Physics (IOP). The abovementioned capping will apply to re-assessed components of the affected School of Physics (PYU code) modules irrespective of the degree stream of the student, registration or visiting student status, or year of first admission. The Sophister PYU modules are not available to any other non-accredited Sophister degree programmes. Re-assessment capping does not apply to deferred 1st attempts at assessment. Further information is available in the relevant programme handbooks.

8. Reassessment⁴

- i. Supplementals should be available in all years.
- ii. The right to supplementals where a student has failed at the annual session should be automatic.⁵
- iii. The same progression regulations, including compensation, should be applied at annual and supplemental sessions.
- iv. Re-scheduled exams within the session should be discontinued.
- v. Students (in all years) should only be required to re-sit examinations or re-submit coursework for failed modules or components thereof.
- vi. Different reassessment modalities should be allowed where appropriate.
- vii. Where supplemental assessments are taken, marks are awarded and agreed as usual. Capping will not be applied.

Social Studies

ii Supplementals

A minimum attendance of 80% is required to pass a module ([see the School entry in the Calendar Part 2 for further details](#))

Should a repeat placement be required, the repeat placement and project must be completed successfully in order to progress on the BSS programme. Only one attempt to repeat a failed placement is permitted.

9. Special Examinations

Special Examinations should be discontinued.

No derogations required.

Appendix 2: Modules with Derogations to Regulation 4iii. Compensation

A **non-compensatable component** is an individual assessment within a module that must be passed independently and cannot be compensated for by performance in other assessment components. A **non-compensatable module** is a module that must be passed overall and cannot be compensated for by performance in other modules.

Chemistry

* Route codes for modules to which this derogation applies. Route codes that take this module but for whom the derogation does not apply are not listed here.

Appendix 3: Non-Compensatable Assessment Component Details

Dental Science

Year 2

All clinical competences must be passed as follows:

- 1 The Static Factors of the Adult Dental Occlusion
- 2 Class I Restoration
- 3 Class II Restoration
- 4 Class III Restoration
5. Patient Care
- 6 Endodontic Treatment– single rooted tooth
- 7 Endodontic Treatment - multi-rooted tooth
- 8 Cardiopulmonary and Automated External

Year 3

All clinical competences must be passed as follows:

- 1 Class II composite restoration1b Class III composite resin restoration
- 2 Dental Radiology competence
- 3 Molar crown preparation
- 4 Class II composite restoration or Class III/IV
- 5 Removable partial dentures, design and assessment of artefacts
- 6 Anterior crown preparation and temporary crown
- 7 Root canal treatment of a single-rooted tooth
- 8 Clinical simulation of dental arch relationships
- 9 Complete dentures/edentulous state

Students must pass each section of the Objective Structured Clinical Exam (OSCE, which is standard set, supplemental available). Students must pass the Occlusion & Function/Prosthodontics multi-station practical examinations.

Year 4

All clinical competences must be passed as follows:

- 1 Orthodontics - Cephalometric Analysis
- 2 Class II restoration in primary molar

- 3 Stainless steel crown restoration
- 4 Exodontia (maxillary premolar or first/second molar tooth)
- 5 Upper anterior occlusal and dental panoramic radiographs
- 6 Radiograph (Bitewings in the primary or mixed dentition)
- 7 Fissure sealant of a permanent molar tooth in a child patient
- 8 Suturing in oral surgery

ASSESSMENT OF THE REFLECTIVE PORTFOLIO IN RESTORATIVE DENTISTRY (three competences below to be completed)

- 1 Clinical root debridement
- 2 Crown restoration on vital tooth
- 3 Restoration of an endodontically treated tooth requiring post and core
- 4 Standard complete dentures
- 5 Removable cobalt chromium partial denture
- 6 Root canal treatment of a multi-rooted tooth

ASSESSMENT OF THE ORTHODONTIC LOG BOOK

Students must pass the Objective Structured Clinical Exam (OSCE, which is standard set, supplemental available). Students must satisfactorily complete the Reflective Portfolio in Restorative Dentistry & the Reflective Portfolio in Oral & Maxillofacial Surgery, Oral Medicine & Oral Pathology

Year 5

All clinical competences must be passed as follows:

- 1 Oral maxillofacial diagnosis
- 2 Intravenous access
- 3 Paediatric dentistry treatment plan
- 4 Radiograph (Bitewings in the primary or mixed dentition)
- 5 Patient management competence
6. Raising a mucoperiosteal flap
- 7 Gowning
- 8 Quadrant dentistry for a child
- 9 Orthodontic case analysis
- 10 Periodontal surgery

ASSESSMENT OF THE ORTHODONTIC LOG BOOK

The pass mark will be 50% in each divisional disciplinary area. The pass mark is 50% for the written examination and the pass mark for clinical examination is 50% for each Division. The clinical examination and the written examination must be passed separately. All three Divisions must be passed. There will be no compensation between the divisional disciplinary areas, e.g. between Child Dental Health and Restorative Dentistry & Periodontology. Within the divisional disciplinary areas, students must pass the written assessments (pass mark 50%) and must pass the clinical assessments (pass mark 50%) separately. Within the divisional disciplinary areas, there will be no compensation from the written assessments to the clinical assessments nor from the clinical assessments (Portfolio and Unseen cases combined or OSCE) to the written assessments. á

Chemistry

Modules within School of Chemistry

† Modules have two different reassessment capping percentages: capping of 40% for Chemistry route codes: UBSCCSCH-1SF, UBSCCSBI-1SF, UBSCCSCM-1SF, UBSCCSMC-1SF, as listed in table below via The Royal Society of Chemistry (RSC) accreditation. Capping of 60% applies to route codes for nanoscience streams: UBSCCSNA-1SF, UBSCPSNA-1SF via Physics via Institute of Physics (IOP) accreditation, see also Physics section below.

Modules outside the School of Chemistry for Chemistry with Biosciences or shared with Physics are listed in separate tables below.

Module Code	Module Name	ECTS	Programme Code	Route Codes*
Junior Fresh				
CHU11101	General And Physical Chemistry	10	UBSC-CSCI-2F, UBSC-GGEO-2F, UBSC-PSCI-2F	UBSCCSCI-2SF, UBSCGGEO-2SF, UBSCPSCI-2SF
CHU11102	Introduction To Inorganic And Organic Chemistry	10	UBSC-CSCI-2F, UBSC-GGEO-2F, UBSC-PSCI-2F	UBSCCSCI-2SF, UBSCGGEO-2SF, UBSCPSCI-2SF
Senior Fresh				
CHU22201	Chemistry 1	10	UBSC-CSCI-1F, UBSC-GGEO-1F, UBSC-PSCI-1F	UBSCCSCI-1SF, UBSCGGEO-1SF, UBSCPSCI-1SF
CHU22202	Chemistry 2	10	UBSC-CSCI-1F, UBSC-GGEO-1F, UBSC-PSCI-1F	UBSCCSCI-1SF, UBSCGGEO-1SF, UBSCPSCI-1SF
CHU22M03	Introduction To Medicinal Chemistry	5	UBSC-CSCI-1F	UBSCCSCI-1SF
CHU22204	Introduction To Environmental And Sustainable Chemistry	5	UBSC-CSCI-1F	UBSCCSCI-1SF
Junior Sophister				
CHU33101†	Advanced Inorganic Chemistry Core 1	5	UBSC-CSCI-1F	UBSCCSCH-1SF, UBSCCSBI-1SF, UBSCCSCM-1SF, UBSCCSMC-1SF
CHU33102†	Advanced Inorganic Chemistry Options 1	5	UBSC-CSCI-1F	UBSCCSCH-1SF, UBSCCSBI-1SF, UBSCCSCM-1SF, UBSCCSMC-1SF
CHU33109	Practical In Inorganic Chemistry	5	UBSC-CSCI-1F	UBSCCSCH-1SF, UBSCCSCM-1SF, UBSCCSMC-1SF
CHU33205	Advanced Organic Transformations	5	UBSC-CSCI-1F	UBSCCSCH-1SF, UBSCCSCM-1SF, UBSCCSMC-1SF

Module Code	Module Name	ECTS	Programme Code	Route Codes*
CHU33207	Synthetic Organic Chemistry 1	5	UBSC-CSCI-1F	UBSCCSCH-1SF, UBSCCSBI-1SF, UBSCCSCM-1SF, UBSCCSMC-1SF
CHU33209	Practical In Organic Chemistry	5	UBSC-CSCI-1F	UBSCCSCH-1SF, UBSCCSBI-1SF, UBSCCSCM-1SF, UBSCCSMC-1SF
CHU33303	Quantum Mechanical Concepts In Physical Chemistry	5	UBSC-CSCI-1F	UBSCCSCH-1SF, UBSCCSBI-1SF, UBSCCSCM-1SF, UBSCCSMC-1SF
CHU33307†	Solid State Materials And Modelling	5	UBSC-CSCI-1F	UBSCCSCH-1SF, UBSCCSCM-1SF, UBSCCSMC-1SF
CHU33309	Practical In Physical Chemistry	5	UBSC-CSCI-1F	UBSCCSCH-1SF, UBSCCSCM-1SF, UBSCCSMC-1SF
CHU33405†	Analytical And Computational Methods	5	UBSC-CSCI-1F	UBSCCSCH-1SF, UBSCCSBI-1SF, UBSCCSCM-1SF, UBSCCSMC-1SF
CHU33409†	Analytical And Computational Methods Workshops	5	UBSC-CSCI-1F	UBSCCSCH-1SF, UBSCCSBI-1SF, UBSCCSCM-1SF, UBSCCSMC-1SF
CHU33442	Drug Design And Development	5	UBSC-CSCI-1F	UBSCCSBI-1SF, UBSCCSMC-1SF
CHU33509	Practical In Inorganic And Physical Chemistry For Chem Bio	5	UBSC-CSCI-1F	UBSCCSBI-1SF
Senior Sophister				
CHU44004†	Inorganic Chemistry	5	UBSC-CSCI-1F	UBSCCSCH-1SF, UBSCCSBI-1SF, UBSCCSCM-1SF, UBSCCSMC-1SF
CHU44005†	Advanced Inorganic Chemistry	10	UBSC-CSCI-1F	UBSCCSCH-1SF, UBSCCSCM-1SF

CHU44123	Problems Module	5	UBSC-CSCI-1F	UBSCCSCH-1SF, UBSCCSBI-1SF, UBSCCSCM-1SF, UBSCCSMC-1SF
CHU44167†	Advanced Physical Chemistry	10	UBSC-CSCI-1F	UBSCCSCH-1SF, UBSCCSCM-1SF
CHU44204	Organic Chemistry	5	UBSC-CSCI-1F	UBSCCSCH-1SF, UBSCCSBI-1SF, UBSCCSCM-1SF, UBSCCSMC-1SF
CHU44205	Advanced Organic Chemistry	10	UBSC-CSCI-1F	UBSCCSCH-1SF, UBSCCSCM-1SF, UBSCCSMC-1SF
CHU44304†	Physical Chemistry	5	UBSC-CSCI-1F	UBSCCSCH-1SF, UBSCCSBI-1SF, UBSCCSCM-1SF, UBSCCSMC-1SF
CHU44405	Advanced Medicinal Chemistry	10	UBSC-CSCI-1F	UBSCCSMC-1SF
CHU44420	Med Chem Capstone Project	20	UBSC-CSCI-1F	UBSCCSMC-1SF
CHU44520	Chemistry With Biosciences Capstone Project	20	UBSC-CSCI-1F	UBSCCSBI-1SF
CHU44705†	Advanced Computational Chemistry	10	UBSC-CSCI-1F	UBSCCSCH-1SF, UBSCCSCM-1SF
CHU44720	CMM Capstone Project	20	UBSC-CSCI-1F	UBSCCSCM-1SF

* Route codes for modules to which this derogation applies. Route codes that take this module but for whom the derogation does not apply are not listed here.

Outside the School of Chemistry - Chemistry with Biosciences

40% capping applies to the UBSCCSBI-1SF route code when taking modules in Biosciences as per Royal Society of Chemistry (RSC) accreditation requirements.

Module Code	Title	ECTS	Programme Code	Route Codes*
Junior Sophister				
BYU33C02	From Organisms To Ecosystems (Chemistry)	10	UBSC-CSCI-1F	UBSCCSBI-1SF
BYU33207	Genomes, Disease And Diversity (Chemistry)	5	UBSC-CSCI-1F	UBSCCSBI-1SF
Senior Sophister				
BIU44610	Nucleic Acids (SS Chemistry With Biosciences)	10	UBSC-CSCI-1F	UBSCCSBI-1SF
BIU44620	Introduction To Immunology And Immunometabolism (Ss Chemistry With Biosciences)	5	UBSC-CSCI-1F	UBSCCSBI-1SF
BIU44630	Molecular Basis Of Disease (Ss Chemistry With Biosciences)	5	UBSC-CSCI-1F	UBSCCSBI-1SF

* Route codes for modules to which this derogation applies. Route codes that take this module but for whom the derogation does not apply are not listed here.

Modules with Dual Capping

Modules listed have two different capping percentages, 40% capping for specified Chemistry route codes, and 60% capping for specified Physics and Chemistry route codes.

Listed Nanoscience modules with CHU and PYU modules have capping of 60% via Institute of Physics (IOP) accreditation for Nanoscience route codes: UBSCCSNA-1SF and UBSCPSNA-1SF as listed below, whether they entered through Chemical Sciences or Physical Sciences.

Module Code	Module Name	ECTS	Capping	Programme Code	Route Codes*
Junior Sophister					
CHU33101	Advanced Inorganic Chemistry Core 1	5	40%	UBSC-CSCI-1F	UBSCCSCH-1SF, UBSCCSBI-1SF, UBSCCSCM-1SF, UBSCCSMC-1SF
			60%	UBSC-CSCI-1F, UBSC-PSCI-1F	UBSCCSNA-1SF, UBSCPSNA-1SF
CHU33102	Advanced Inorganic Chemistry Options 1	5	40%	UBSC-CSCI-1F	UBSCCSCH-1SF, UBSCCSBI-1SF, UBSCCSCM-1SF, UBSCCSMC-1SF

* Route codes for modules to which this derogation applies. Route codes that take this module but for whom the derogation does not apply are not listed here.

Physics

List of modules delivered in the School of Physics with 60% re-assessment capping.

‡ The School of Physics modules are Semester 1 only, or Semester 2 only, 5 credit versions of the year-long 10 credit laboratory modules, which are relevant to and taken by only those students taking a semester abroad, e.g., PYU33PP5 in Semester 1, and PYU33PP6 in Semester 2.
