ECU44201— International Trade

Module Information	
Module Code	*ECU44201*
Module Title	*International Trade*
Department	*Economics*
Year Group	*Senior Sophister*
Module Personnel	*Prof. Marvin Suesse*
Academic Year	*26-27*
Credit Weighting	*10 credits*
Semester	Semester 1
Contact Hours	*2 lectures per week*

Module Content	
Module Description	*This module provides an introduction to international trade theory, which uses the standard tools of microeconomics to analyse economic interactions between countries. The subject asks questions such as: what determines the level and composition of trade between countries? What are the effects of trade on consumer welfare and income distribution? What are the effects of tariffs, quotas, and other trade policies?*
Module Learning Aims	*This is one of the classical subjects in economics and is an attractive module choice for senior sophister students that wish to develop analytical skills for interpreting a wide set of issues in international trade. The module provides a survey of all the main topics in international trade.*
Learning Outcomes	*Learning Outcomes On successful completion of this course, students will be able to demonstrate: • knowledge of classical and modern theories of international trade • analytical skill in the evaluation of international trade policies • capability in the interpretation of international trade data*
Indicative Reading / Resources	*Rob Feenstra and Alan M. Taylor, International Economics, Worth publishers (any edition)*

Assessment	
Assessment Components	*Essay 50%, Exam 50%*
