To use this conversion table, first identify the distribution number (0, 1, or 2) for the exchange host. Then, for numerical marks, use the left-hand side of the table to convert to the TCD School of Engineering mark distribution thresholds 0, 1 or 2. Intermediate values are linearly interpolated. For letter or whole number grades, use the right-hand side of the table. There is no linear interpolation applied here.

Please note: this information is subject to change and will be periodically updated based on an ongoing review of grade statistics in partner universities.
