

<b>Module Code</b>	<b>MEU44B05</b>
<b>Module Name</b>	<b>Laser Processing and Additive Manufacturing I</b>
<b>ECTS Weighting<sup>1</sup></b>	5 ECTS
<b>Semester taught</b>	Semester 2
<b>Module Coordinator/s</b>	Dr. Moyin Otubela ( <a href="mailto:otubelmv@tcd.ie">otubelmv@tcd.ie</a> ), Prof. Garret O' Donnell ( <a href="mailto:odonnege@tcd.ie">odonnege@tcd.ie</a> ), Prof. Rocco Lupoi ( <a href="mailto:lupoir@tcd.ie">lupoir@tcd.ie</a> )
<b><u>Module Learning Outcomes</u> with reference to the <u>Graduate Attributes</u> and how they are developed in discipline</b>	<p>On successful completion of this module, students should be able to:</p> <ol style="list-style-type: none"> <li>1. Comprehend the fundamentals of different additive manufacturing technologies, whether they are based on cold spray or metal melting.</li> <li>2. Provide an appreciation for why additive manufacturing is so important to many branches of industry and how to apply additive manufacturing technology in different settings.</li> <li>3. Compare against each other, the most relevant additive technologies such as Laser Powder Bed Fusion and Cold Spray. Understand involved processing parameters and advantages and challenges with implementing robotics assisted additive manufacturing methods.</li> <li>4. Calculate power requirements and process performance in laser manufacturing.</li> <li>5. Understand the basic working mechanisms of lasers, components, and be aware of the laser types currently available.</li> <li>6. Be aware of the hazards involved in dealing with lasers and safety classification.</li> <li>7. Develop and present a conceptual design solution to a precision machine operating. The specifics of this outcome will vary on a year to year basis.</li> <li>8. Understanding the role of optics in laser based systems.</li> </ol> <p><b>Graduate Attributes: levels of attainment</b></p> <p>To act responsibly - Introduced</p> <p>To think independently - Enhanced</p> <p>To develop continuously - Enhanced</p> <p>To communicate effectively - Introduced</p>

---

<sup>1</sup> [TEP Glossary](#)

## Module Content

- Lasers and basic principles. Cavity design for CO<sub>2</sub> lasers.
- Laser cutting, drilling, and welding
- Laser surface treatments. Laser micro-manufacturing.
- Laser Powder Bed Fusion (L-PBF)
- Titanium metallurgy and heat treatment processes
- Robot Assisted Additive Manufacturing
- Thermal Spray
- Grinding and abrasive processes
- Fundamentals of welding
- Welding processes

### Module Description

In high value added manufacturing industry, engineers are required to understand how mechanical systems and materials behave at length scales at the micron level. The objective of this module is to develop the student's skills and knowledge in both precision engineering and micro engineering. The module will consider selected topics in precision, micro-manufacturing, ranging from enabling technologies and processes to applications. The module is research-lead, hence the content can vary on a year to year basis. Currently, most of the module is around LASER based manufacturing, LASER-Additive Manufacturing (3D printing) with metallic materials, and related automation.

The module will require an active participation of the students.

## Teaching and Learning Methods

This module is typically a small group environment with approximately 40 or less people participating. Hence the class forms the basis for discussion on topics, as well as more formal podium style lectures. Examples related in the class are often based on topical issues. Visiting lectures range from industry to visiting researchers.

<b>Assessment Details<sup>2</sup></b> <b>Please include the following:</b> <ul style="list-style-type: none"> <li>• <b>Assessment Component</b></li> <li>• <b>Assessment description</b></li> <li>• <b>Learning Outcome(s) addressed</b></li> <li>• <b>% of total</b></li> <li>• <b>Assessment due date</b></li> </ul>	Assessment Component	Assessment Description	LO Addressed	% of total	Week due
	In-class exams	3x in-class exams	1-10	60%	continuous
	Continuous Assessment	Multiple Choice Quizzes	1-6	40%	Continuous
<b>Reassessment Requirements</b>					
<b>Contact Hours and Indicative Student Workload<sup>2</sup></b>	<b>Contact hours: 42 Hours (33 lectures, no tutorials)</b>				
	<b>Independent Study (preparation for course and review of materials): 39</b>				
	<b>Independent Study (preparation for assessment, incl. completion of assessment): 39</b>				
<b>Recommended Reading List</b>	<p>Kalpakjian &amp; Schmid, 2006, Manufacturing Engineering &amp; Technology, Pearson pub.</p> <p>Dornfeld &amp; Lee, 2007, Precision Manufacturing, Springer pub.</p> <p>W. Steen, Laser Material Processing.</p> <p>I. Gibson   D. W. Rosen   B. Stucker, 2010, Additive Manufacturing Technologies, Springer</p> <p>Journal papers recommended in class.</p>				
<b>Module Pre-requisite</b>					
<b>Module Co-requisite</b>
