Registering with a doctor (GP)

A UK student visa entitles you to use of the national health service while you are in the UK. We recommend registering with a GP practice at the start of your studies in case you need healthcare during your stay. Call the doctor's surgery in your area (see list below) to make an appointment to register and to find out which documents you need to bring. You may like to bring a list of your medications with you.

Often you will be initially offered a phone call from the doctor. Your phone will usually say 'private number' and you will not get a second call if you miss it! If the doctor decides you need to be seen in person, you will be offered an appointment in the clinic.
