# General Advice

- You are not making a decision that is going to shape your career.
- You can only make a decision on the information you have available to you
- For the majority of you, you don't have enough experience to figure this out right now.
- Figuring out what you want to do will evolve over time (many years)
- Both you and the world around you is constantly changing. What you think you want to do now may not be what you will want to do in 2/5/10 years time

# General Advice

- For most careers that our graduates go into there are multiple routes to get there.
- If you don't get to study a particular moderatorship there is often the option of doing further study that will allow you to progress towards what you want to do.
- In terms of graduate outcomes there are significant overlap between lots of the moderatorships

# “What moderatorship is most employable”

- Employability has many factors the subject of the moderatorship is only one
- Unless you have a clear idea about what you want to do this is a difficult question to answer
- Pick your moderatorships preferences on the subject areas that you are most interested in, that you will fully engage with and that you will do well academically
- Employers are increasingly interested in the transferable skills – teamwork, communication, problem solving, initiative, motivation

# TR060 Biological and Biomedical Sciences: Graduate Outcomes

Graduate Outcomes Survey conducted in April post graduation.  
Snapshot of where our students are 9 months after finishing degree.

Biological and Biomedical Sciences class of 2022, 2023, 2024:

62% of graduates are in employment or due to start a job in the next 3 months .

30% of graduates have gone onto further study – of these 15% indicate that they have gone onto a PhD- 8% indicate they have gone onto do Graduate Medicine

# Secondary Teaching

- If you want to teach in a second level school your undergraduate degree will need to register with the teaching council- [www.teachingcouncil.ie](http://www.teachingcouncil.ie)
- To do this you need to have completed “an undergraduate degree, which enables the holder to teach at least one approved curricular subject AND the completion of a postgraduate programme of initial teacher education (such as the Professional Masters in Education (PME)) geared towards the post-primary age range (typically 12-18 years).”
- Your undergraduate degree must meet the requirements outlined by the teaching council for any subject you hope to teach
- The curricular subject requirements for each subject can be found here- <http://www.teachingcouncil.ie/assets/uploads/2026/01/05.01.26-Curricular-Subject-Requirements.pdf>
- If you are interested you will need to ensure that your degree will allow you to meet these requirements. You should map the modules you can take in your moderatorship onto the subject requirements for the subject(s) you want to teach
