

Job Description

Comp ID:	038710
Job Title:	Assistant Professor in Statistics
School/Department:	School of Computer Science and Statistics
Job Category and Level:	Academic; Assistant Professor (Tenure Track)

The Purpose of the Role

Trinity College Dublin, located in the heart of Dublin, is Ireland's number 1 university and ranked 75th internationally (QS Rankings 2026). The School of Computer Science and Statistics is a collegiate, friendly, and research-intensive centre for academic study and research excellence. The School has been ranked 1st in Ireland, top 25 in Europe, and top 100 Worldwide in recent years (QS Subject Rankings). The School is embedded in Trinity College Dublin's E3 programme (www.tcd.ie/e3/), which is a collaboration across information technology, engineering and the natural sciences to address major challenges of our time and create a more sustainable future, through both teaching and research.

The School of Computer Science and Statistics is seeking to appoint an Assistant Professor in Statistics, who will join the Discipline of Statistics and Information Systems. The Assistant Professor will be a full faculty member, and as such will be expected to innovate in both research and teaching, to assist in the administration and mission of the School, and to contribute to the wider research community. The appointee should have the potential to develop into a leader in their particular field of research with a world-class research programme. The successful candidate will be expected to contribute to undergraduate and/or postgraduate teaching in the School, particularly in areas of Statistics and Information Systems, including contributions to a number of online programmes.

Context

The successful candidate will be an excellent researcher and lecturer with a strong international research track record and clear potential for research leadership. They should have a strong commitment to research-led undergraduate and postgraduate teaching and a demonstrated capacity/potential to attract research funding and develop a world-class research programme.

Applications are encouraged from candidates in the field of Statistics, who have a genuine commitment to the role of teaching Statistics at undergraduate and postgraduate level across many disciplines in Mathematics, Science, Engineering and the Humanities. The successful applicant will

have a primary degree and a Ph.D. in Statistics or another subject with a strong statistical component. The group particularly welcomes applicants who have experience and interest in working in an interdisciplinary setting, and most notably individuals who can exploit the Discipline's position within a School of Computer Science and Statistics.

Main Responsibilities

Research

- The appointee should have a desire to become a thought leader and a researcher of repute within their chosen research area.
- As part of their research duties, the appointee is required to engage in research and/or other creative and innovative activity as appropriate to the Discipline.
- The appointee is required to disseminate their research in high impact academic publications: journals, conferences, or other outlets as appropriate.
- The appointee is strongly encouraged to actively pursue initiatives by which to seek/secure funding for research in their own field and/or interdisciplinary or multidisciplinary research as appropriate.
- The appointee is also required to participate in postgraduate research supervision including student recruitment, thesis definition, preparation, advice and regular advisory and guidance meetings.

Teaching

- As part of normal teaching duties, the appointee is obliged to give instruction and supervision, as directed by the Head of School (or Head of Discipline), to undergraduate and postgraduate students at the University in courses and programmes organised and supported by the School.
 - It is expected that the appointee will be responsible for teaching Statistics modules in the School. Our Statistics modules span a range of taught programmes, including the BA in Management Science and Information Systems Studies (MSISS), the M.Sc. in Statistics and Sustainability, and the online postgraduate programmes in Statistics and Data Science.
 - Teaching duties include curriculum and course design, preparation and delivery of lectures, tutorials and general examination, other assessment duties and contributing to the review and improvement of the School's recently developed online programmes.
-

-
- The appointee is also required to be available to students for academic guidance and advice.

Contribution and Scholarly Activity

- The appointee is required to participate in academic administration at School level (as directed by the Head of School), and/or at University level.
 - In representing the University externally, the appointee is required to maintain the highest professional standards.
 - The appointee is also required to engage in scholarly activity such as, but not limited to, refereeing for journals, external examining, membership of learned societies, advisory bodies and peer review panels.
-

Person Requirements

The role-holder will require the following knowledge, skills and attributes for successful performance in the role.

Qualifications

The successful candidate must have a PhD in Statistics or a cognate discipline.

Knowledge & Experience

The successful candidate will be expected to clearly demonstrate the following:

Teaching

Essential:

- Ability to provide lectures and practical classes in Statistics and related fields to undergraduate and postgraduate students.
- Evidence of a personal commitment to excellence in teaching.
- Excellent communication and interpersonal skills.

Desirable:

- Experience of using innovative teaching methods.
- Experience of developing new modules and/or teaching material and being able to critically assess existing online teaching materials for revision.
- Experience of supervising undergraduate and postgraduate dissertations.
- Evidence of high-quality teaching.

- Experience of working collaboratively and effectively in an inter and multidisciplinary environment, particularly in the context of the College's E3 programme.

Research & Scholarship

Essential:

- Proven record in research publication and an ability to contribute to the field of Statistics.
- Demonstrate research plans that complement the strategic plans of the School of Computer Science and Statistics.
- Evidence of, or potential to establish, a sustained record of high-quality research and publication in Statistics.
- The potential to attract graduate students.
- Track record of participation in research conferences and seminars.
- Ability to engage in research collaboration with industry and across disciplines.

Desirable:

- Demonstrated ability to secure competitive research funding.
- Demonstrated ability to lead and oversee research projects.
- Evidence of research collaboration with industry, society and universities, particularly in the context of the College's E3 programme.

Engagement with Discipline & Society

Desirable:

- Experience of reviewing papers for scholarly journals and conferences.
- Experience of organizing scholarly events.
- Experience of engagement with the public on matters of research or education.
- Experience of contributing to the wider work of a university or research institution.

Expected Skills and Competencies

- Highly motivated and driven by a desire to succeed.
- Excellent communication skills.
- Good organisational skills.
- Strong leadership skills.
- Ability to work effectively as member of a team.
- Honesty and integrity.
- Ability to be flexible when necessary.
- Willingness to contribute to the Discipline, School, College and the wider community.

- Ability and motivation to take initiative.
- A commitment to own professional development.

In addition, candidates will be assessed on their potential contribution to the School, College and the wider community.

Application Information

Applicants should provide the following information:

1. A brief cover letter.
2. A comprehensive curriculum vitae, including a full list of publications.
3. The names and contact details (i.e., addresses, e-mail, etc.) of three referees.
4. A research plan summarising research to be carried out in the next two years and including potential sources of funding – **max. 2 pages**.
5. A teaching statement summarising teaching experience and approach – **max. 2 pages**.

PLEASE NOTE:

- Candidates who do not submit this additional information may not be considered for shortlisting.
- Candidates should note that the interview process for this appointment will include the delivery of a presentation to the School.

Further Information for Applicants

For further information about the School of Computer Science and Statistics, see:
