Job Description

Job Title: Post-Doctoral Researcher (3D Computer Graphics, 3D Computer Vision)

School of Computer Science and Statistics, Trinity College Dublin, Ireland

We are seeking a highly motivated candidate for a fully funded postdoctoral researcher position to work in 3D computer graphics and 3D computer vision.

The successful candidate will join the 3D Graphics and Vision research group led by Prof. Binh-Son Hua at the School of Computer Science and Statistics, Trinity College Dublin, Ireland to work on topics related to generative AI in the 3D domain.

The School of Computer Science and Statistics at Trinity College Dublin is a collegiate, friendly, and research-intensive centre for academic study and research excellence. The School has been ranked #1 in Ireland, top 25 in Europe, and top 100 Worldwide (QS Subject Rankings 2018, 2019, 2020, 2021).

The postdoctoral researcher is expected to conduct fundamental research and publish in top-tier computer vision and computer graphics conferences (CVPR, ECCV, ICCV, SIGGRAPH) and journals (TPAMI, IJCV). Other responsibilities include supporting graduate or undergraduate students with technical guidance and engagement in other research activities such as paper reviews, reading group, workshop organization, etc.

The start date of the position will be as soon as possible. Contract duration is 1 year with the option of renewing for a second year.

The successful candidate will require the following skills and knowledge:

- PhD in Computer Science or related fields;
- Strong tracked records in 3D computer graphics, 3D computer vision;
- Hands-on experience in training deep models and generative models is required;
- Hands-on experience and relevant skills in computer graphics and computer vision application development such as OpenGL, OpenCV, CUDA, Blender is desirable;
- Strong programming skills in C++, Python. Capability in implementing systems from research papers and open-source software.

- Additional background in math, statistics, or physics is an advantage.

Applicants should provide the following information:

- A comprehensive CV including full list of publications;
- The name and contact details of two referees. One of the referees should be the applicant's PhD supervisor;
- Two representative papers by the applicant.

Interested candidates should email their applications to Binh-Son Hua (<https://sonhua.github.io>) directly. Applications will be reviewed on a rolling basis until the position has been filled.
