

# The MAMMI study

The MAMMI study started in 2012 and has grown substantially since then, with continuing new developments. With over 3000 women participating, it has become the largest study in Ireland of its kind, and hopes to improve mothers' health in Ireland and beyond.

## MAMMI 1 The Rotunda Hospital

### 2012

Survey 1 (*antenatal*)

1847 completed

Survey 2 (*3 months*)

1462 (86%) completed
