Demonstratorship/PhD Studentship

A 3 year Demonstratorship/PhD studentship, funded by the School of Medicine is available within the Department of Pharmacology and Therapeutics, Trinity College Dublin. The successful candidate will join a dynamic research team, which is focussed on the role of protein phosphatases and their endogenous inhibitors in vascular disease.

The PhD project will investigate the role of novel small molecule inhibitors of PP2A on permeability of the brain microvasculature. A part of the studentship also involves assisting the 2nd year pharmacology course coordinator.

The position will be funded at €16,000 per annum plus academic fees and the successful applicant will register for a PhD within the Department of Pharmacology & Therapeutics at TCD. The ideal candidate will have a primary degree (minimum 2.1 honours or equivalent) in a biomedical or related science. We are looking for an enthusiastic person who has good communication skills, an ability to work within a multidisciplinary team, and interest in developing their teaching skills. The studentship will commence September 2018. Informal enquiries can be made to Dr Paul Spiers (paul.spiers@tcd.ie; 01-8962146).

Applications for this position are to be made via the following page
