Overview of options available to those interested in taking stand alone modules in Nursing Specialist – Renal

All modules are NFQ Level 9 and may be taken as ‘stand alone’ modules offering high flexibility to those who wish to build towards a valued academic qualification in renal nursing.

This flexible approach allows candidates to choose any number of theory modules.

Upon successful completion of each module, candidates will receive a module transcript.

**Module Transcript**
Candidates will receive a Module Transcript for each module successfully completed.

The Module Transcript will include a description of specialist content covered, the NFQ level (9) and the number of ECTS earned.
