Goals of the Training Program

The JBI Comprehensive Systematic Review Training Program enables participants to learn how to conduct robust systematic reviews of different evidence types; to provide the strongest possible evidence to inform decision making or clinical guidelines in healthcare. This world-class training program incorporates both theory and hands-on experience so that by the end of it, participants have a completed protocol and are ready to commence their review. Participants who successfully complete the program can become official JBI accredited Reviewers and are supported to publish in the JBI Database of Systematic Reviews and Implementation Reports (JBISRIR).

"This is a great program, thank you! The pace of learning was good and the opportunity to put it into practice with examples was invaluable." - past participant
Register for your place on the training program

The Joanna Briggs Institute (JBI) is an evidence-based healthcare research institute working towards a vision of the world in which the best available evidence is used to inform decision making at the point of care globally. The JBI and its 70 collaborating entities promote and support the synthesis, transfer and implementation of evidence through identifying feasible, appropriate, meaningful and effective healthcare practices to assist in the improvement of healthcare outcomes globally.

There are 15 places available for which priority will be given to staff from health service providers who are collaborating with TCPHI. Due to very high demand, the deadline to register and pay is 31 October 2019 (23:00 GMT). The deadline for refund requests is 1 March 2020 (12:00 GMT). Requests must be submitted in writing to tcphi@tcd.ie. No cancellations will be accepted after this date but places can be transferred to other nominated individuals at no extra cost. The training will take place in the School of Nursing & Midwifery, Trinity College Dublin from the 8 June to 12 June 2020 at a cost of €1,100 per participant. Details of the trainers will be released closer to the time of the training program in June 2020.

JBI Program

This five-day course will give you an in-depth and comprehensive understanding of the principles and processes of undertaking systematic reviews. Participants who successfully complete the program can become official JBI accredited Reviewers.

Day 1 will comprise of Module 1 in which you will learn about the origins of evidence-based healthcare, evidence-based healthcare today and creating systematic literature.

Days 2 & 3 will cover Module 2 in which you will learn about common research designs such as randomised controlled trials; how to critically appraise research; identify important sources of bias in research; introduction to statistics in evidence-based healthcare when and how to conduct meta-analysis.

Days 4 & 5 will cover Module 3 in which you will learn about the importance of qualitative research in healthcare; common qualitative research designs such as phenomenology and ethnography; how to critically appraise qualitative research; identify different methods for synthesizing qualitative research and learn when and how to perform a meta-synthesis of qualitative research.
