InPhysEd
Inclusive Physical Education
An EIT funded Summer School

The aim:
The aim of the InPhysEd summer school is to empower participants from different countries and disciplines to develop solutions for including students with an intellectual disability (ID) in physical education classes.

Inclusive learning is of critical importance for promoting positive health and wellbeing to all members of the population.

This project will help develop inclusive learning through cooperation of teacher trainees, sports & health science students, and people with ID. All of whom will work together to co-design solutions.

Who is involved:
The summer school is jointly organized by Trinity College Dublin (TCD) and the Technical University of Munich (TUM).

What the programme offers?
This summer school is an innovative way to upskill and to kick start your educational and professional development.

Through expert content from academic and industry partners, students will develop skills in critical thinking, problem solving and proposing creative solutions for the delivery of physical education at all school levels.

This is also an opportunity to develop competencies in the areas of designing and pitching solutions using an entrepreneurial mind-set. Students will meet people from different countries, and different disciplines, to collaborate in interdisciplinary solution focused proposals and extending their networks of support.

For more information contact us via email InPhysEd@tcd.ie

Further information

Dates of the Summer School: 7th-19th of July. The summer school will run in TCD from the 7th – 12th of July and in TUM 15th–19th July.

Locations: Trinity College Dublin and Technological University of Munich.

Cost: No tuition fees. Accommodation provided. Students must cover travel costs. Please check website for conditions.
