School of Engineering

Role of External Examiners

Role of External Examiners at undergraduate level in the School of Engineering:

The School of Engineering appoints external examiners to evaluate the quality and academic standards of the following undergraduate courses and streams at Senior Sophister and MAI level: Engineering

- Biomedical Engineering
- Civil, Structural and Environmental Engineering
- Computer Engineering with shared responsibility for Electronic and Computer Engineering
- Electronic Engineering with shared responsibility for Electronic and Computer Engineering
- Mechanical and Manufacturing Engineering
- Engineering with Management

As part of the role, External Examiners:

i.   Review Senior Sophister and MAI exam papers
ii.   Review examination scripts with particular attention paid to borderline cases
iii.   Review projects
iv.   Meet with students
v.   Advise on allocation of prizes
vi.   Attend departmental exam meetings
vii.   Identify and communicate areas for improvement at the Court of Examiners and document them in the External Examiner Annual Report
