

## Appendix 1: School and Programme Handbook Policy

Please note the order of items listed in this appendix is neither prescriptive nor exhaustive. Programmes should use their local expertise and student feedback to ensure items are in an order appropriate to their programme. There may be additions appropriate to the needs of an individual School that reflect the local regulations of the School/Discipline and are in accordance with the Calendar.

Please note that reference/source URLs may change due to the updating of policies.

<p><b>Teaching &amp; Learning</b></p>	<p>Explanation of ECTS Weighting</p>	<p><b>Standard Text:</b> The European Credit Transfer and Accumulation System (ECTS) is an academic credit system based on the estimated student workload required to achieve the objectives of a module or programme of study. It is designed to enable academic recognition for periods of study, to facilitate student mobility and credit accumulation and transfer. The ECTS is the recommended credit system for higher education in Ireland and across the European Higher Education Area.</p> <p>The ECTS weighting for a module is a measure of the student input or workload required for that module, based on factors such as the number of contact hours, the number and length of written or verbally presented assessment exercises, class preparation and private study time, laboratory classes, examinations, clinical attendance, professional training placements, and so on as appropriate. There is no intrinsic relationship between the credit volume of a module and its level of difficulty.</p> <p>The European norm for full-time study over one academic year is 60 credits.</p>	<p><a href="#">Description of ECTS for use in Course Handbooks</a></p>

## Appendix 1 – School and Programme Handbook Policy

		<p>Within undergraduate courses, 1 credit represents 20-25 hours estimated undergraduate student input, so a 10-credit module will be designed to require 200-250 hours of undergraduate student input including class contact time, assessments and examinations.</p> <p>Within postgraduate courses, 1 credit represents 25 hours estimated postgraduate student input, so a 10-credit module will be designed to require 250 hours of postgraduate student input including class contact time, assessments and examinations.</p> <p>ECTS credits are awarded to a student only upon successful completion of the programme year. Progression from one year to the next is determined by the programme regulations. Students who fail a year of their programme will not obtain credit for that year even if they have passed certain component. Exceptions to this rule are one-year and part-year visiting students, who are awarded credit for individual modules successfully completed.</p>
